# CURRENT MACROECONOMIC AND FISCAL DEVELOPMENTS

## 1. Current macroeconomic developments

### 1.1. Economic activity

**Gross Domestic Product (GDP).** In the first quarter of 2019, real economic growth of 2.5% was recorded. All production sectors except agriculture and industry, gave a positive contribution to GDP growth. The services sector retains the role of the main growth driver, with a contribution of 2.0 pp. After strong growth in 2018, positive developments in the construction sector continue in the first quarter of 2019, with recorded growth of 12.3% and contribution of 0.4 pp. On the other hand, industry with a fall of 1.6% y-o-y in the first three months had a negative impact on the overall growth rate. The developments in the agricultural sector is estimated on the basis of multi-year average yields, which in comparison with the very good 2018 gives a negative contribution. Private consumption and investment activity are the most important sources of growth observed from the expenditure side, and they contributed with 2.2 pp and 1.4 pp, respectively. Continuation of the investment cycle and thus increased demand for capital equipment and intermediate goods, determine the negative contribution of net exports to overall economic growth.

In the first quarter of 2019, seasonally adjusted GDP has upped by 0.3% in comparison with the previous quarter.

According to the calculations of GDP, by production approach in constant prices (2010 reference year), category taxes less subsidies increased by 3.3% in comparison to the same quarter 2018.

\* Source: SORS; calculated in MoF.

**Industrial production.** According to the Statistical Office of the Republic of Serbia (SORS) data, industrial production in May 2019 has decreased annually by 0.6%, while compared to the average industrial production in 2018 decreased by 1.1%. The largest influence on industrial production fall in May 2019 compared to May 2018 had the divisions of: manufacture of food products, manufacture of chemicals and chemical products, manufacture of beverages, manufacture of coke and refined petroleum products, as well as manufacture of wood and of products of wood and cork, except furniture.

Observed by NACE Rev. 2, in May 2019, annual increase in production was registered in mining and electricity section of 2.2% and 3.7% respectively, while the decrease of 1.6% was recorded in manufacturing. The largest increase in production was recorded in production of furniture (17.7%), while manufacture of chemicals and chemical products had decreased the most (-23.3%).

The industrial production volume in May 2019, in comparison to the same month in 2018, recorded an decrease within 16 divisions, which accounts for 50.4% of total industrial production, while a increase in 13 divisions, accounts for 49.6% of the total industrial production.

Observed by the **Main industrial groupings (MIGs)**, in May 2019, compared to May 2018, a decrease in the production was recorded in the production of non-

durable consumer goods (-5.9%) and capital goods (-0.3%), while an increase was recorded in the production of durable consumer goods (4.7%), intermediate goods, except energy (1.7%) and energy (1.6%).

In the first five months of 2019 it was recorded a decrease of industrial production of 1.3%. Observed by MIGs, the main contribution to the decline of industrial production came from the production of energy (decrease of 4.7%) due to the decrease in production of coke and refined petroleum products. Production of non-durable consumer goods has recorded a fall of 1.7% due to decreased production of wearing apparel, of food products and of beverages. Decrease in production of electrical equipment has influenced the most to the decrease of 3.2% in output of the group of durable consumer goods. Increase in production of capital products of 5.5% is a result of increase in production of machines industry. Also, an increase of 0.2% was observed in the production of intermediate goods, except energy, due to increase in production of rubber and plastic products and production of metal industry.

The seasonal adjustment of the industrial production index for May 2019, compared to April 2019, indicates an increase of 1.3% of the overall industrial production and an increase of 2.6% of manufacturing.

According to the SORS data, in May 2019 stocks increased by 0.3% compared to May 2018. The largest annual decrease in stocks in May was recorded in the stocks of computer, electronic and optical products (-31.6%), while the largest growth was in the stocks of other transport equipment (47.6%).

**Retail trade turnover.** Annual growth of the retail trade turnover in May 2019 increased by 8.3% in nominal and by 5.9% in real terms, compared to May 2018. Also, in May, turnover in real terms, increased by 6.9% compared to the average monthly retail trade turnover in 2018, while compared to the previous month, increased by 0.1%.

Annual growth of the categories food, beverages and tobacco was 8.5% in nominal terms, while in real terms increased by 5.1%. Also, category non-food products, except automotive fuel increased in nominal and real terms by 8.7% and 8.0%, respectively. Motor fuel's turnover increased by 7.1% in nominal and by 4.0% in real terms.

Increase in the retail trade turnover in nominal terms was observed in all the regions: Srbija – Sever by 7.0%, Region Vojvodine by 6.1% and Srbija – Jug by 10.4%, y-o-y. Observed in real terms, growth in the turnover was registered in all the regions, and the biggest increase of 8.1% y-o-y was recorded in the Srbija – Jug region.

In the period January–May 2019, compared with the same period of 2018, the retail trade turnover increased by 11.0% in nominal, and by 8.2% in real terms.

**Tourism.** Annual growth in the number of tourists' visits was registered in May 2019 (3.5%). At the same time, the number of overnight stays increased by 6.1% compared to the same month of the previous year. The number of domestic tourists' visits increased by 6.0%, while the number of their overnight stays increased by 9.6%, compared to the same month in 2018. At the same time, the number of foreign tourists' visits continued to grow by 0.3%, while their overnight stays also increased by 0.1%. Share of the foreign tourists' visits and their overnight stays was 42.6% and 34.4%, respectively.

Most of the tourists in May 2019 originated from China, Bosnia and Herzegovina, Slovenia, Croatia, and Germany (36.1% of the total number of foreign tourists' visits and 33.1% of total overnight stays), while the largest annual growth was registered in the tourists' visits from Luxembourg. In May, mountain resorts were more visited than the spas (18.3% and 17.1% of the total number of visits, respectively). On the mountains and spas most of the tourists were of domestic origin, while in city of Belgrade most of the tourists were foreigners (83.9% of the total number of visits). The largest number of overnight stays was recorded in spas (28.6% of the total number of overnight stays of all tourists).

In the period January–May 2019, the number of tourists and their overnight stays totaled 1,292,751 and 3,550,395, respectively. The number of tourists' visits increased by 4.3%, while the number of their overnight stays increased by 5.5%, compared to the same period of 2018. In this period, it was registered increase in the number of foreign tourists' visits by 2.7% and their overnight stays increased by 5.8%. At the same time, the number of domestic tourists' visits increased by 5.6%, while their overnight stays increased by 5.3%.

## 1.2. External Trade and Balance of Payments

**External trade.** In May 2019, it was exported EUR 1,572.6 million of goods, which is an increase of 11.6% compared to May 2018. The biggest contribution to annual growth of the exports came from the exports of basic metals (3.0 pp), electrical equipment (2.3 pp) and exports of rubber and plastic products (1.5 pp). Import of goods amounted to EUR 2,081.9 mill, which is an increase of 14.5% compared to May 2018.

Foreign trade deficit amounted to EUR 509.3 million, which is 24.5% higher compared to the same month of the previous year, while 75.5% of the exports was covered by the imports.

Seasonally adjusted series shows that in May 2019 in comparison to the previous month, export increased by 5.1% and imports increased by 4.2%.

In the period January-May 2019, exports and imports amounted to EUR 7,087.4 million and EUR 9,588.1 million, respectively, which is an increase of 8.3% and 10.8%, compared to the same period in 2018. During the observed period trade deficit amounted to EUR 2,500.7 million which is 18.8% higher compared to the same period of the previous year.

According to the SITC sections, in the period January-May 2019 the largest share in the exports came from the export of electrical machinery and apparatus (12%). Significant share in the exports also came from road

vehicles, iron and steel, rubber products and non ferrous metals, which including electrical machinery amounted to for 32.9% of total exports. In the observed period, 25.6% of total imports came from import of road vehicles, petroleum and petroleum products, electrical machinery and apparatus, medicinal and pharmaceutical products and general industrial machinery and equipment.

In the period January-May 2019, positive trade balance (EUR 713.4 million) was achieved by the following sectors: food and livestock, miscellaneous manufactured products, manufactured goods classified chiefly by material, animal and vegetable oil and beverages and tobacco.

In the period January-May 2019, largest external trade partners were EU countries on which related 68.5% of total exports and 60.1% of the total imports. In observed period 42.5% of the total exports were related to the trade with: Germany, Italy, Bosnia and Herzegovina, Romania and Russian Federation. Imports from Germany, Russian Federation, Italy, China and Hungary accounted for 44.1% of the total imports. Surplus of EUR 975.8 million was achieved in external trade with Bosnia and Herzegovina, Montenegro, North Macedonia, Romania, Slovakia, United Kingdom, Bulgaria, Croatia, Slovenia, Sweden, Italy and Moldova. The largest deficit was achieved in external trade with China (due to imports of telephones for network stations and laptops), Russian Federation (due to imports of energy, mainly petroleum and gas) and Germany.

**Balance of payments<sup>1</sup>.** In April 2019, the current account recorded a deficit of EUR 194.3 million, which is lower by EUR 37.3 million compared to the deficit in the April in 2018. Lower current account deficit was due to lower primary income deficit, while deficit on goods and services account continues to grow and in April was higher by EUR 32 mill compared to the same month in previous year. The goods deficit increased by EUR 39.9 million, while the services surplus is higher by EUR 7.9 mill, compared to the April 2018.

In April 2019, net inflow of foreign direct investments amounted to EUR 325.6 million, which is higher by EUR 49.7 mill, compared to the same month in previous year. Net outflow of other and portfolio investments amounted to EUR 242.4 million and EUR 52.2 million, respectively.

<sup>1</sup> Since April 2014, Balance of Payments of the Republic of Serbia is being presented according to the Balance of Payments Manual and international investment position, VI edition of the International Monetary Fund (BPM6).

In the period January-April 2019, the balance of payments position of the country was deteriorated. The current account deficit in this period amounted to EUR 1,130.9 million and it was higher by EUR 175.1 million compared to the same period of previous year, due to higher deficit on goods and services account.

The trade deficit increased by EUR 225.1 million, while the surplus in the services trade increased by EUR 11.5 million. The primary income deficit decreased by EUR 65.6 mill, mainly due to lower outflows of investment income. The secondary income surplus is lower by EUR 27 million compared to the same period of previous year and amounted to EUR 1,118.4 million.

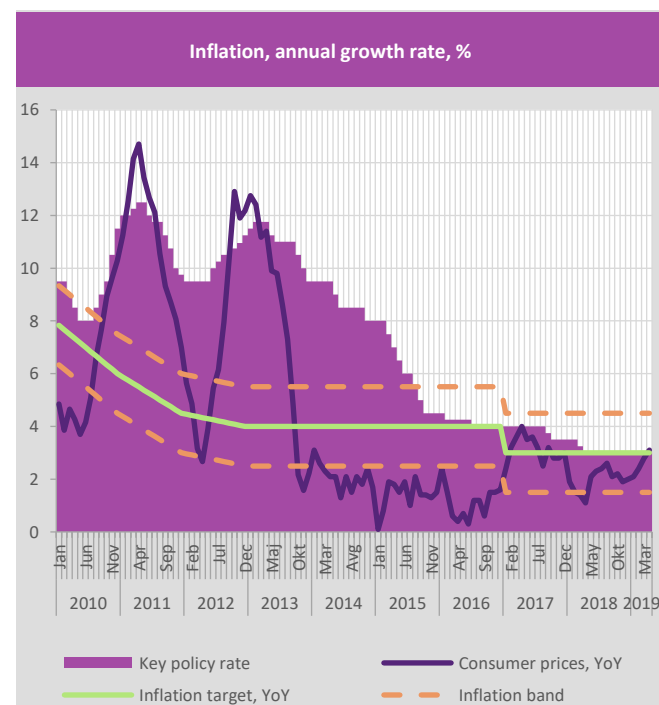

In the period January-April 2019, net inflow of foreign direct investments amounted EUR 1,131.4 million,

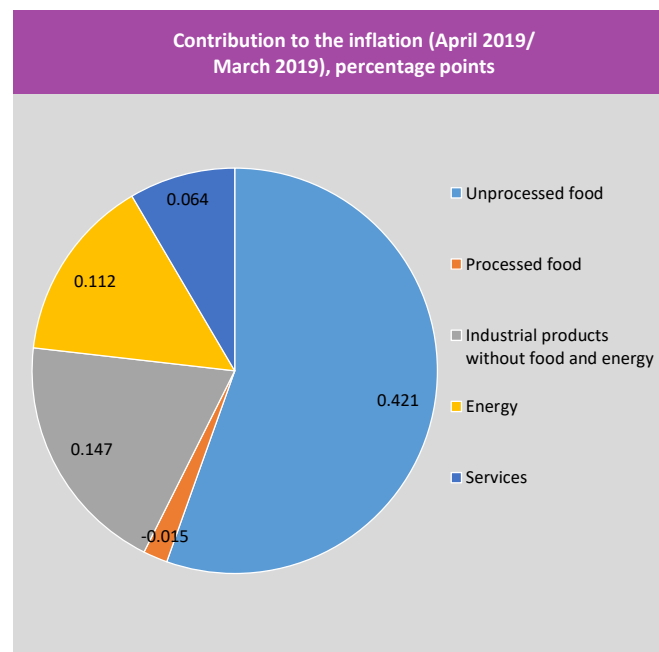

which is higher by EUR 132 mill compared to the same period in previous year. Other and portfolio investments recorded net outflow of EUR 131.1 mill and EUR 100.8 mill, respectively.

### 1.3. Inflation

Annual inflation in April 2019 was within the limit of the NBS target tolerance band ( $3\% \pm 1.5$  pp) and totaled 3.1%.

Consumer prices in April 2019 increased compared to previous month by 0.7%.

Core inflation, measured by the increase of the consumer prices from which is excluded the increase of energy, food, alcohol and tobacco in April increased by 0.5%, while increased by 1.4%, y-o-y.

## 1.4. Labor market

According to data from Labor Force Survey in first quarter of 2019, unemployment rate totaled 12.1% which is decrease of 2.7 percentage points y-o-y. At the same time employment rate of 47.4% represents improvement by 2.3 percentage points.

According to data from the CROSO registry average number of formally employed in April 2019 increased by 2.0%, y-o-y, which is the result of growth in employment in the private sector (3.5%), while in the public sector decreased by 1.5%. In the period January-April of 2019, number of employees increased by 2.8% y-o-y. At the same time, most significant growth in employment was recorded in manufacturing industry and construction.

According to the National employment agency data (NEA) at the end of April number of unemployed persons actively seeking employment totaled 552 thousands which is compared to the same month of the previous year decrease by 9.4%, while in the period January-April of 2019 decreased by 9.2%.

**Salaries.** In March 2019, the average net salary increased by 6.9%, y-o-y, in real terms, with increase of salaries at the same time in private and in public sector. Observed by activities growth of salaries, was influenced the most by the trade and manufacturing industry. The increase in salaries was also influenced by an increase in the minimum labor cost per working hour from RSD 143 in 2018 to RSD 155.3 starting from January 2019.

**Pensions.** Average paid pension in April 2019 increased in real terms compared to same month of previous year by 2.3%, while in the period January-April increased by 2.8% y-o-y.

## 1.5. Monetary developments

In May 2019, NBS kept it's key interest rate to the level of 3.00%.

Through May, banks as largest single investors in state treasury bills increased their invested funds on that basis by RSD 2.7 billion. Compared to the same month

in 2018 banks increased their invested funds by RSD 23,8 billion.

At the end of May 2019, compared to same month of 2018 bank loans to economy registered increased by 8.0%, while loans to households increased by 10.9%. At the same time bank deposits registered growth of 10.9%. In structure of loans to economy by destination biggest share had loans for current assets and investment loans (40,0% and 40.1%, respectively), with yearly decrease of loans for current assets by 7.5% and increase of investment loans by 41.0%. At the same time at loans landed to households, biggest share had cash loans (41.0%) with yearly growth of 16.6% and housing loans (37.2%), with yearly growth of 7.4%.

In structure of bank sources of funds dominant share had borrowed sources. At the end of May 2019 in total fund sources borrowed sources share was 83.9%, which is an increase of 1.1 pp y-o-y, while in comparison to the previous month remained unchanged. In currency structure of funds, foreign currency sources share was 52.5%, and compared to previous month decreased by 0.3 pp, while compared to the same month of previous year increased by 0.9 pp.

NBS foreign exchange reserves increased by EUR 319.6 million compared to previous month, while compared to the same month of previous year increased by EUR 772.4 million and totaled EUR 11.7 billion at the end of May 2019. FX reserves were boosted by the inflows resulting from successful FX reserves management, grants, usual banks' activity with regard to FX reserve requirements, and other sources. Level of NBS foreign exchange reserves was sufficient for coverage of 182% of M1 monetary aggregate and for coverage of more than five months of imports of goods and services.

Household foreign currency savings at the end of May 2019 compared to previous month increased by EUR 44.9 million and totaled EUR 10.3 billion. Compared

to same month of previous year foreign currency savings increased by EUR 706.7 million.

Developments on the foreign exchange market in May 2019 compared to previous month were characterized by real depreciation of dinar against Euro by 0.4%, while in nominal terms, there were no changes. In comparison to the same month of 2018, foreign exchange rate recorded nominal and real appreciation of 0.2% and 1.1%, respectively. In order to mitigate extensive daily oscillations of exchange rate, NBS throughout May intervened on the foreign exchange market by buying EUR 110 million.

### 1.6. Financial markets

In May 2019 Belgrade stock exchange registered total turnover of securities in amount of RSD 4,709.1 million, from which turnover of shares and Republic of Serbia bonds (RS bonds) totaled RSD 1,168.4 million and RSD 3,540.7 million, respectively. In comparison to the same month of previous year, total turnover decreased by 15.4%. Total number of transactions decreased from 4,745 in May 2018 to 2,852 in the same month of 2019.

Total market capitalization at the end of May 2019 amounted to RSD 523.8 billion and increased by 0.2% compared to previous month, while compared to same month of previous year decreased by 2.4%.

In May 2019 foreign investors share in total turnover accounted for 13.40% and increased by 9.04 pp in comparison to same month of 2018. Share of foreign investors in turnover of shares decreased by 20.11 pp and amounted to 10.15%, while the share of foreign investors in turnover of RS bonds amounted to 14.47%, which represents an increase of 12.54 pp compared to same month in 2018.

During May 2019 on Belgrade stock exchange index BELEXline registered decrease in value of 2.4% and totaled 1,558.70 index points, while the value of BELEX15 index decreased by 1.4% and totaled 733.32 index points. Compared to same month of 2018, index BELEXline decreased by 0.4%, and index BELEX15 decreased by 1.0%.

### 1.7. International environment

According to the Eurostat's estimation, GDP growth in Q1 2019 in the euro area and the EU upped by 1.2% and 1.5%, respectively, compared to Q1 2018, while comparing to the previous quarter increased by 0.4% and 0.5%, respectively. According to the EC outlook, the continuation of the recovery of the euro zone is foreseen. Projected growth in the medium-term period will speed up from 1.1% in 2019 to 1.5% in 2021, while the average yearly inflation will grow to 1.6% in 2021. Growth forecast is based upon accommodative monetary policy, improving labour market conditions, stronger foreign demand and some fiscal loosening.

Average **prices of agriculture products** have decreased by 1.6% in May compared to the previous

month, while the **food prices** decreased by 3.3%. Average **base metals prices** decreased by 0.5% compared to previous month, while the price of iron ore recorded a increase of 7.7%, and cooper price decreased by 6.5%. According to the World Steel Association, world production of steel in May 2019 increased annually by 5.4%, while in China by 10.0% (slightly more than a half of World production). In the group of **precious metals**, the price of gold has decreased by 1.2%, while the price of silver also decreased by 2.8%.

Value of the Composite PMI index in May amounted to 51.8 ip (up by 0.3 i.p. compared to previous month), due to the increased growth of manufacturing output. Economic Sentiment Indicator (ESI) has increased by 0.2 i.p. in the EU28 (103.8 ip) while in the euro area inclined by 1.2 ip (105.1), compared to previous month.

At the end of May 2019, the unemployment rate in the euro area reached 7.5%, which is the lowest unemployment rate since July 2008. At the same time, unemployment rate in Germany was 3.1% and in EU28 and Italy it was 6.3% and 9.9%, respectively. At the same time, according to the data of the Russian Statistical Office, in the Russian Federation the unemployment rate was 4.5%.

Trend of inflation has decreased during May, when the euro area registered an inflation of 1.2%, and the EU28 registered an inflation of 1.6%. At the same time in Germany was observed inflation of 1.3%, while in Italy of 0.9%. Observed by categories the largest

increase was in the prices of: services, energy, food and alcohol and tobacco. In Russia, the annual inflation in February reached 5.1%.

In July, ECB decided to keep the interest rate at record low level of 0%, while FED lowered key interest rate to an interval of 2.00% to 2.25% range.

According to the OPEC data, the price of oil type Urals has amounted to 71.68 \$/barrel in May (down by 0.2% compared to previous month). Since the beginning of the year, the price decreased by 1.8% compared to the same period in 2018 (to 66.89 \$/barrel).

\* Sum of four quarters. \*\* MoF Estimation. <sup>1</sup> Due to the conducted revision of GDP by the SORS for the period 2005–2017 data are not comparable with data before this period. SORS will publish missing data during 2019. <sup>2</sup> The data refers to the period January–March 2019. <sup>3</sup> From 01/01/2010 Telekom Srbija, Joint Stock Company ceased to observe impulses in fixed network domestic traffic and started to present the subject services in minutes. <sup>4</sup> Including turnover generated by legal entities and entrepreneurs. <sup>5</sup> Index shall be accounted according to the data compiled for producer's price index for industrial products in domestic market and producer's export price index for industrial products. <sup>6</sup> Since January 1st 2010 general trade system has been introduced. Data for 2007, 2008 and 2009 changed according to new methodology. <sup>7</sup> Since April of 2014 Balance of Payments of the Republic of Serbia is shown by the Manual of balance of payments and international investment position, the sixth edition of the International Monetary Fund, the 2009th (BPM6). Accordingly, data for year 2012 and 2013 are corrected. <sup>8</sup> Since September 2010 methodology for the external debt statistics has been changed. NBS has revised the data to the external debt since 2009. <sup>9</sup> GFS-1986 methodology. <sup>10</sup> Data on foreign currency savings since December 2012 according to new methodology of NBS. <sup>11</sup> Population aged 15 and above. <sup>12</sup> New methodology for salaries, SORS applied from January 2009, from January 2018 the average salary is calculated on the basis of data from the Tax Administration records. <sup>13</sup> SORS Changed data for employment. Without registered individual agricultural workers. <sup>14</sup> Since 2012 with professional army servicemen. <sup>15</sup> Data refers to period January–April 2019.

<sup>1</sup> Since September 2010 methodology for the external debt statistics has been changed so that the external public debt includes obligations under the IMF SDR allocation, which was used in December 2009, as well as capitalized interest to Paris Club creditors, while the loans concluded before December 20, 2000, under which the payments have not been effected, are excluded from the external debt of the private sector. <sup>2</sup> NBS has revised the data to the external debt since 2009. <sup>3</sup> According to the new methodology of GDP - ESA 2010. Due to the conducted revision of GDP by the SORS for the period 2005–2017 data are not comparable with data before this period. SORS will publish missing data during 2019.

<sup>1</sup> New methodology for salaries, which is applied from 2009. as SORS extended coverage of observation units. In calculation of average salaries, beside salaries paid to employees in enterprises, institutions and organizations, into account are taken also salaries paid to entrepreneurs, from January 2018 the average salary is calculated on the basis of data from the Tax Administration records. <sup>2</sup> Every year in Health and social work section half of salary is paid in December and another half in January. <sup>3</sup> Since 2012 with professional army servicemen.

# METHODOLOGICAL EXPLANATIONS

---

**IV**

# ECONOMIC, FISCAL AND STATISTICS OF PUBLIC DEBT

**1. Economic statistics** (tables in Chapter I, Macroeconomic Developments) are based primarily on the statistical methodology and data provided by the Statistics Office of the Republic of Serbia, National Bank of Serbia, National Employment Agency, Privatization Agency, Belgrade Stock Exchange, Pension and Disability Insurance Fund of the Republic of Serbia etc.

Economic Statistics contained in the Chapter I includes: main indicators of macroeconomic developments in the annual and monthly dynamics for the current year; gross domestic product (GDP) in constant prices and its growth rates by quarters and usage of GDP; trends in physical volume of industrial production in monthly dynamics (total, by sections and economic purpose); consumer prices trends in annual and monthly dynamics; developments of overall consumer prices (in total and by components) in monthly dynamics for current year; producer prices of industrial products for domestic market and for export in annual and monthly dynamics; developments of exports in monthly dynamics; prices of external trade in annual, quarterly and monthly dynamics; developments in Foreign direct investments in quarterly dynamics; external debt in annual dynamics and in last month of current year; balance of payments in annual and monthly dynamics; monetary survey by years; main monetary indicators, household savings and foreign exchange reserves, total number of employed and unemployed and average net salaries and pension benefits (in dinars and annual real growth rates) in annual and monthly dynamics; an overview of privatization results in annual dynamics and for a specific period of the current year for which there are available data; an overview of trends of indices; market capitalization and foreign investors participation in total turnover on Belgrade Stock Exchange; an overview of turnover of securities on the Belgrade Stock Exchange; an overview of auctions of Republic of Serbia treasury bills in annual dynamics and on daily basis.

**2. Fiscal statistics** (tables in Chapter II Fiscal Developments) is based on the GFS methodology and data of the Ministry of Finance, Treasury Administration and Public Debt Administration. Starting from Memorandum on the Budget and Economic and Fiscal Policy for 2009 with projections for 2010 and 2011, IMF methodology – Government Finance Statistics is used to present and create projections for fiscal aggregates. All data in this bulletin have been computed by using the same methodology basis.

The main objectives of alignment with methodology of Government Finance Statistics is the possibility to perceive macroeconomic implications of fiscal policy. It is particularly important to perceive the influence of fiscal policy on domestic demand, hence every item of revenues and expenditures is considered from its aspect, regardless of its classification in accounting.

Here is a comparative overview of the previous and the new methodology of government finance statistics.

**1. The level of observation** is consolidated government sector that comprises the following levels of government: the central government – budget of the Republic of Serbia and Social Security Organizations; local government – budget of the Autonomous Province of Vojvodina and budgets of municipalities and towns; public road company Putevi Srbije and Koridori Srbije Ltd.

**2. Coverage of data:** beside budget resources, application of this methodology in computation of fiscal aggregates includes other sources of financing – a part of own resources of government bodies, donations, loans and privatization receipts. The previous coverage included only budget resources and expenditure financed from budget resources.

**3. The method of computation of results:** The deficit or surplus of consolidated government sector is the difference between revenues and overall expense plus net budget borrowing. The category of net landing is treated as an expense in cases when the purpose of the spending is implementation of a government policy, while if expense is made in order to manage liquidity, it becomes a financing item, without any influence on the government's result.

**4. The difference in accounting and statistical coverage of particular items of expenditure:** in view of the primary objective – gaining insight into macroeconomic implications of the fiscal policy, particular items of the expenditure, e.g. repayment of debt to pensioners, which is treated in accounting as a part of repayment of debt – without influence on the result, statistically is treated as transfer to citizens and on ground influences increase in domestic demand. Mobile telephony license, treated in accounting as current non-tax revenue, in view of its one-time character is now treated as part of financing.

With advancement of accounting base – i.e. with transition to accrual basis in recording government transactions – conditions will be created for further enhancement of government finance statistics methodology and for alignment with the EU (ESA 95).

The Ministry of Finance is responsible for collection and processing of fiscal data. Fiscal statistics includes: consolidated balance of the general government sector and particular balances, i.e. budget of the Republic of Serbia (central government), budget of AP Vojvodina, budget of local authorities, financial plans of social

security organizations, public road company Putevi Srbije and Koridori Srbije Ltd.

**General government.** General government sector comprises all the levels of government in the country. Subsectors that form general government include: central government – budget of the Republic of Serbia, provincial government - AP Vojvodina, local government- municipalities, towns, social security funds, public road company Putevi Srbije and Koridori Srbije Ltd. Fiscal statistics, with regard to the individual state subsectors, is especially significant for the understanding of interrelation between different governmental levels, separation of functions as well as division of revenues. It is important to determine the amounts and the flow of transfers between governmental levels, which is achievable only owing to the individual and separate balances of all governmental levels. However, only the data presenting the entire general government may provide the information concerning the amount of fiscal operations of the state, consumption of the state and its influence on aggregate demand and total macroeconomic stability, reallocation of collected funds originating from other economic sectors, burden of taxation of the economy, tax structure etc.

**Central government-budget of the RoS.** Central government comprises all the ministries, agencies, and other special organizations defined as direct or indirect republic budget beneficiaries.<sup>2</sup> The Government may define and achieve set goals concerning economic policy at the level of the entire country, primarily through the implementation of certain measures and programmes by the means of the budget of central government. Other governmental levels do not economic policies concerning the national level. The more centralized is the country, the more significant are the data related to this level of government<sup>3</sup>.

**AP – Vojvodina.** Budget of AP Vojvodina comprises all governmental authorities and other special organizations defined as AP Vojvodina budget beneficiaries.

**Local self-government.** Data concerning local self-government relate to the data collected in all cities and municipalities constituting the local self-government system. The coverage of data at the level of cities or municipalities relate to all direct or indirect budget beneficiaries of a city or a municipality. The budget beneficiary of a city or a municipality is an institution primarily financed from the funds originating from the local government. Local government controls its business activities and it performs certain functions through the institution<sup>4</sup>.

<sup>2</sup> Indirect republic budget beneficiaries are primary and secondary schools, faculties, scientific institutes, social welfare institutions, cultural institutions and other institutions partly financed from the Republic budget.

<sup>3</sup> The largest amount of tax revenues, apart from property taxes, pertains to the budget of the RS. Income tax is renounced in the legally defined percentage to the local self-government, whereas a part of the revenues collected from income taxes realised in the territory of Vojvodina pertains to the AP Vojvodina. This shows the importance of the central governmental level in the country.

<sup>4</sup> Primary and secondary schools pertain to the central government as their financing is mostly provided from that level. A part of material expenses of schools is financed from local self-government funds but not in the extent sufficient for pertaining of these institutions to the local government. Pre-school institutions are local budget beneficiaries. When reviewing data regarding their

**Social security organizations.** Social security organizations include the Pension and Disability Insurance Fund, Republic Health Insurance Fund, Military Health Fund and National Employment Service.

**Public road company Putevi Srbije.** Revenues of Putevi Srbije have the character of public revenues (toll and transfers from republican budget), and repayment of a large part of the company's debt takes place from the Republic of Serbia budget, therefore the company is treated as a part of the general government sector.

**Koridori Srbije LTD.** are a Government owned company, responsible for investment in road infrastructure.

## BASIC FISCAL AGGREGATES

Basic fiscal aggregates are total public revenues, total public expenditures, and the result of the difference between these two categories, which is defined as surplus or deficit in the consolidated balance of general government or balances of individual governmental levels.

**Total public revenues** are divided into two basic categories: current revenues and yield on capital.

**Current revenues** are divided into tax and non-tax revenues.

The basic characteristics of **tax revenues** is their mandatory nature and non- existence of any direct reciprocal service for the payment of taxes. The state collects taxes finances certain state functions from collected funds. The benefits related to certain functions cannot be directly connected to an individual who paid the tax.

**Income tax** comprises wage tax, as well as taxes on other forms of earnings of individuals, beside the wages.

**Corporate income tax** comprises, in addition to corporate profit tax narrow meaning of the term, also tax on dividends paid to the residents and non-residents, as well as the tax on interests, royalties and capital incomes realized by non- residents.

**VAT** comprises national VAT, import VAT, and the arrears of turnover taxes from the previous years.

**Excise duties** present consumption taxes concerning specific products such as oil, tobacco, coffee, alcoholic beverages etc.

**Customs duties** and other import duties comprise revenues from duties paid for import of goods and services, with the exception of the VAT on imported goods that is included in VAT revenues.

**Other tax revenues** comprise taxes on use, ownership and carrying of goods, and other taxes. The property tax of local government is included in the category of other tax revenues in the general government consolidated balance.

revenues and expenditures, they are included in the local government level.

**Non-tax revenues** are heterogenic category of revenues including property revenues (collected interest, rental fees) compensations, taxes, fines and other revenues that cannot be classified. As opposed to tax revenues, non-tax revenues imply the existence of reciprocal favor for the sum collected - e.g. the compensation for the usage of natural resources. However, there are revenues that may by their characteristics be classified as non-tax revenues, but without implying the reciprocal favor for the collection. Fines are a typical example of this sort of revenue.

**Capital revenues** comprise only revenues originating from the sale of capital goods, as well as the capital transfers from non-governmental institutions. The sale of capital goods imply the sale of non-financial assets, buildings, inventories and state-owned land.

**Total expenditures** in the Bulletin of Public Finance are presented according to the economic classification emphasizing the type of expenses, i.e. its economic characteristics and influence of state consumption on the market of goods and services, financial market and reallocation of income. In addition to the economic classification of expenditure, there is also a functional classification emphasizing the function the state performs by using of funds for specific purposes<sup>5</sup>. The Bulletin of Public Finance does not contain expenditures classified in accordance with the functional classification.

Overall expenditure is divided into current expenses, capital expenses and net budget borrowing.

**Current expenses** present final budget outflows, and are not intended for the procurement of non-financial assets.

**Compensation of employees** comprise (net) salaries of employees including income tax and contributions paid by employees, contributions paid by employers, as well as other fringe benefits (transport allowance, sick leave allowance for the period up to 30 days etc.).

**Procurement of goods and services** comprise payments related with coverage of business expenses (electricity, phone bills etc.), business trips, services contracts, current maintenance and procurement of material.

**Repayment of interests** is divided into repayment of interests on domestic debt, interests on external debt, interests based on activated guarantees and accompanying borrowing expenses.

**Subsidies** comprise all the funds transferred to the economic sector (public enterprises, registered agricultural holdings etc.) for the coverage of running expenses or/and the grant intended for current business activities.

**Social insurance and social welfare expenses** include payments to person insured with social security organizations (pensions of beneficiaries of Pension and Disability Insurance Fund, sick leave benefits paid by the Republic Health Insurance Fund, unemployment benefits paid by the National Employment Service,

Repayment of debt to pensioners, children and family benefits, benefits for war-disabled persons, pregnancy leave benefits, housing benefits, Military Health Fund expenditures etc.

**Other current expenses include** grants to non-governmental organizations, mandatory levies and penalties imposed by one governmental level to another, fines and penalties imposed by courts and judicial bodies, injury compensations or compensations for damages incurred by natural disasters, and damages incurred by the public bodies.

**Capital expenses** comprise all the payments intended for the procurement of non-financial assets, construction of buildings and infrastructure, procurement of equipment and inventories and the purchase of land.

**Net lending** are expenses for purchase of financial assets whose objective is implementation of a particular government policy.

**General government consolidated balance** contains consolidated revenues and consolidated expenditure.

**Consolidated revenues** are aggregate revenues of individual governmental levels, but in the consolidation procedure, transfers received from other governmental levels are excluded. In the consolidation procedure, benefits paid by general government in the function of employer are excluded from the revenues of mandatory social insurance organizations.

**Consolidated expenses** present aggregate expenditures of individual governmental levels, while in the consolidation procedure, transfers provided from one governmental level to another are excluded. In the consolidation procedure, expenditures paid by general government in the function of employer are excluded from the expenditures.

**Consolidated surplus / deficit** is a difference between consolidated revenues and consolidated expenditure.

**Balance surplus/ deficit of individual governmental levels** is a difference between total revenues and total expenditures, at a particular governmental level.

**Earnings** not included in the revenues of general government present earnings based on domestic and external borrowing and earnings based on the privatization of state-owned enterprises.

**Expenses** that are not included in general government expenses are those for repayment of principal of national and foreign debt and expenses for purchase of financial assets that cannot be classified as net lending.

**3. Public Debt Statistics** (Tables in Chapter III – Public Debt) is based on the data of the Republic of Serbia Treasury Administration. The public debt of the Republic of Serbia consists of direct liabilities (received loans) and indirect liabilities (issued guarantees).

<sup>5</sup> Division of expenditures according to the functional classification is the following: general public services, defence, internal security, economic affairs, environmental protection, housing construction and municipal services, healthcare, recreation, culture and religion, education and social welfare.

## 1. Direct Liabilities

Direct Liabilities of the RoS are those incurred on the basis of the loans taken. Direct liabilities, depending on the creditor, constitute the following: (1) domestic debt and (2) foreign debt.

**Domestic Debt** consists of liabilities carried over from the past, and liabilities stemming from short-term treasury notes. The largest share in the domestic debt is the one of the frozen foreign currency savings, which also constitutes the largest individual debt in the public debt of the RoS.

**Foreign Debt** consists of (1) rescheduled old debt and (2) new borrowing.

**The rescheduled debt** consists of: (1) the debt towards International Bank for Reconstruction and Development (IBRD, A, B, C), (2) debt towards the Paris Club of Creditors, (3) debt towards the London Club of Creditors, (4) debt towards Council of Europe Development Bank (CEB).

## 2. Indirect Liabilities

Indirect liabilities of the RoS are those incurred on the basis of the issued guaranties. Due to the fact that the guaranties that have been issued up to date were related with loans taken from foreign creditors, total indirect liabilities fall under the category of foreign debt.

### Public Debt to Gross Domestic Product Ratio

Debt to GDP ratio is one of the most important indicators of the public debt sustainability and one of the convergence criteria for joining the EMU.

### Structure of Interest Rates

The ratio between the fixed and variable interest rates in the public debt of Serbia is distinctly favorable. High share of the fixed interest rates provides high level of predictability of future liabilities arising from the interest and thus the Republic of Serbia is not exposed to the interest rate risk.

### The Public Debt Currency Structure

The public debt consists of different currencies. The largest share, however, is the debt denominated in Euros and US Dollars.
