CURRENT MACROECONOMIC AND FISCAL DEVELOPMENTS

1. Current macroeconomic developments

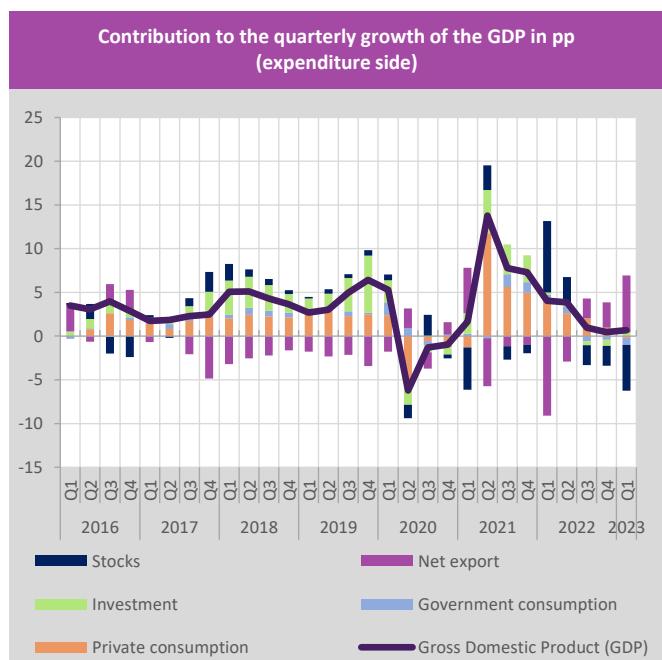

1.1. Economic activity

Gross domestic products. In the first quarter of 2023, gross domestic product (GDP) recorded a real year-on-year growth of 0.7%, which is unchanged from the flash estimate.

Observed from the production side, in the first quarter, the most significant positive impact comes from service activities, primarily information and communication (0.5 pp) and professional, scientific and technical activities, administrative and support service activities (0.3 pp). Industrial production makes a positive contribution of 0.3 pp, while the effect of agricultural production is slightly positive. On the other hand, the negative contribution comes from net taxes (-0.2 pp) and construction (-0.1 pp).

Observed by expenditure aggregates, GDP growth in the first quarter 2023 was entirely driven by net exports with contribution of 6.5 pp, while the contribution of domestic demand was negative. Exports recorded a real growth of 8.3% y-o-y, while imports activity recorded a decrease of 1.8% y-o-y primarily as a consequence of lower real energy imports. In addition, investments make a positive contribution of 0.4 pp. On the other hand, the main negative contribution to GDP growth came from changes in inventories (-5.2 pp), followed by government and private consumption with negative contributions of 0.8 pp and 0.2 pp, respectively.

In the first quarter of 2023, seasonally adjusted GDP decreased by 0.2% in comparison with the previous quarter.

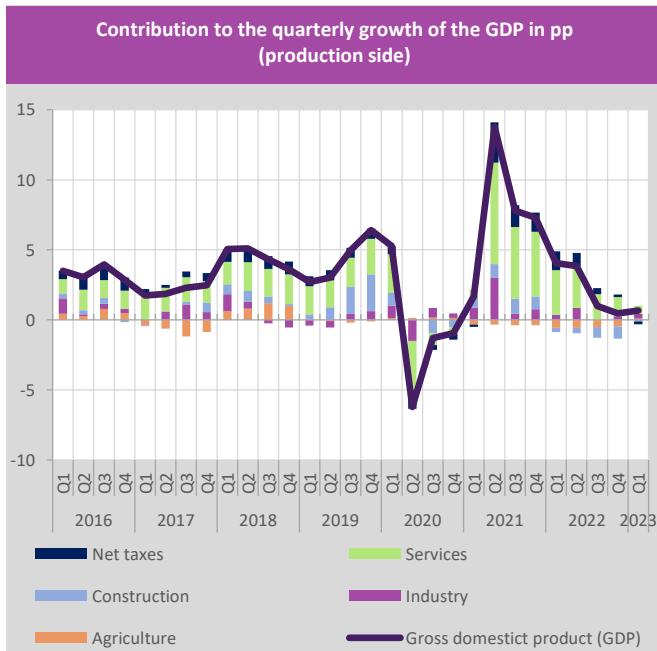

Industrial production. According to the Statistical Office of the Republic of Serbia (SORS) data, industrial production in April 2023 has increased annually by 0.4%, while compared to the average industrial production in 2022 increased by 0.5%. The largest influence on industrial production growth in April 2023 compared to April 2022 had the divisions of: electricity, gas, steam and air conditioning supply, mining of metal ores, manufacture of machinery and equipment n.e.c., manufacture of computer, electronic and optical products, as well as manufacture of basic pharmaceutical products and pharmaceutical preparations.

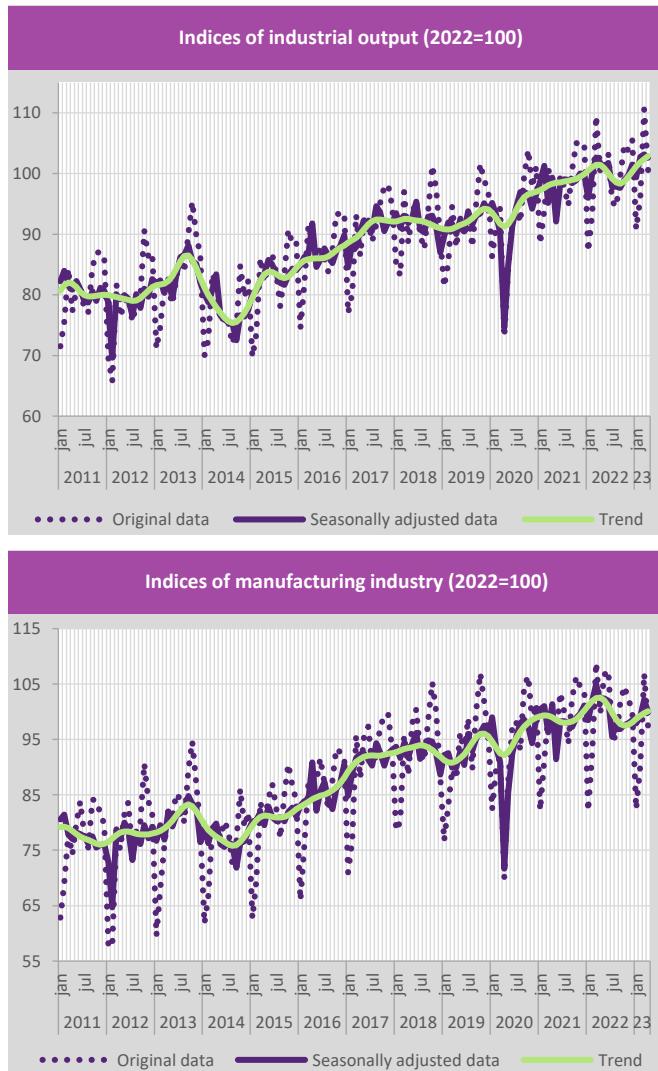

Observed by NACE Rev. 2, in April 2023, annual increase was recorded in electricity, gas, steam and air conditioning supply of 14.6%, while decrease was recorded in manufacturing of 2.6% and mining and quarrying of 0.2%. The largest increase in production was recorded in manufacture of computer, electronic and optical products (79.5%), while manufacture of other mining and quarrying has decreased the most (-27.3%).

The industrial production volume in April 2023, in comparison to the same month in 2022, recorded an increase within 10 divisions, which accounts for 51% of the total industrial production, while a decrease in 19 divisions, which accounts for 49% of the total industrial production.

Observed by the Main industrial groupings (MIGs), in April 2023, compared to April 2022, an increase was recorded in the production of capital goods (12.3%), energy (2.8%) and non-durable consumer goods (1.4%), while a decrease was recorded in the production of durable consumer goods (-6.5%) and intermediate goods, except energy (-6.2%).

In the first four months it was recorded an increase of industrial production of 1.9% y-o-y. Observed by MIGs, the main contribution to the increase of industrial production came from the production of energy of 8.9%, as the result of the growth of electricity, gas, steam and air conditioning supply. The production of capital goods increased by 13.8%, mostly due to the increase in the production of machinery and equipment n.e.c. The pharmaceutical industry had the most significant positive contribution to the growth of non-durable consumer goods of 2.0%. On the other hand, the decline in production of intermediate goods except energy of 7.9% was mostly due to the decline in production of basic metals. Also, the production of durable consumer goods decreased by 2.5%, due to the decline in furniture production.

The seasonal adjustment of the industrial production index for April 2023, compared to March 2023, indicates a decrease of 1.2% of the overall industrial production, and a decrease of 0.8% of manufacturing.

According to the SORS data, in April 2023 stocks increased by 4.4% compared to April 2022. The largest growth was in the stocks of manufacture of wood and of products of wood and cork (92.9%), while the largest annual decrease in stocks in April was recorded in the stocks of other transport equipment (-38.0%).

Retail trade turnover. The retail trade turnover in April 2023 increased by 7.3% in nominal terms, whereas in real terms decreased by 6.1% in comparison with April 2022. Compared to the average monthly retail trade turnover in 2022, the retail trade turnover in April 2023 decreased by 4.6% in real terms. Compared with the previous month, turnover in real terms increased by 0.9%.

Annual growth of the category food, beverages and tobacco in April was 13.1% in nominal terms, whereas in real terms decreased by 6.1%. Category non-food products, except automotive fuel increased in nominal terms by 6.1% and decreased in real terms by 8.3%. Motor fuel's turnover decreased by 3.5% in nominal terms and decreased by 2.8% in real terms.

Year-on-year increase in the retail trade turnover in April in nominal terms was observed in all the regions: Srbija – Sever by 7.3%, Region Vojvodina by 9.4% and Srbija – Jug by 7.2%. Observed in real terms, decline in the retail trade turnover was registered in all regions and the highest real decline was observed in Region Srbija – Sever by 6.7%.

In the period January–April of 2023 in comparison with the same period of the previous year, the retail turnover increased by 10.4% in nominal terms, whereas in real terms is registered a decrease of 4.5%.

Tourism. Annual growth in the number of tourists' visits was registered in April 2023 at 22.2%. In the same time, the number of overnight stays increased by 17.7% compared to the same month of the previous year. The number of foreign tourists' visits increased by 37.7% and the number of their overnight stays increased by 28.6% as well. Share of the foreign tourists' visits and their overnight stays is 47.7% and 47.2%, respectively. The number of domestic tourists' visits increased by 10.7%. Also, the number of domestic tourists' overnight stays increased by 9.5%, compared to the same month in 2022.

Most of the tourists in April 2023 originated from Russia, Bosnia and Herzegovina, Turkey, North Macedonia and Bulgaria (38.0% of the total number of foreign tourists' visits and 38.3% of their total overnight stays). In April, city of Belgrade had the largest number of tourist arrivals (32.4% of the total number of arrivals). A higher number of domestic tourists compared to number of foreign tourists was recorded in spas and mountain resorts, whereas in the other places most of the tourists were foreigners with share of 61.0% in the total number of arrivals (of which, foreign tourists share in the city of Belgrade was 85.5%).

In the period January–April of 2023, the number of tourists and their overnight stays totalled 1,087,658 and 3,372,875, respectively. The number of tourists' visits increased by 19.9% and the number of their overnight stays increased by 16.5% as well, compared to the same period of 2022. The number of foreign tourists' visits increased by 40.6% and their overnight stays recorded

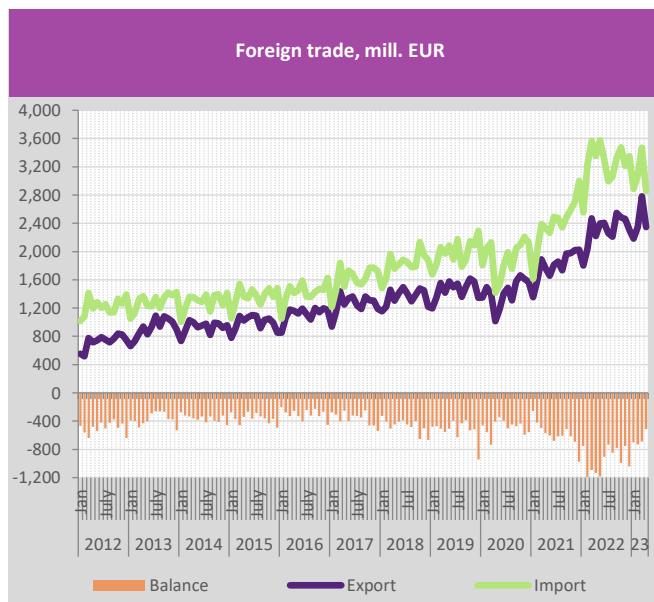

an increase of 32.7%. In the same time, the number of domestic tourists' visits increased by 5.8%, while their overnight stays increased by 5.4%.

1.2. External Trade and Balance of Payments

External trade. In April 2023, it was exported EUR 2,345.4 million of goods, which is higher by 5.6% compared to the April 2022. The most contribution to the year on year growth of exports came from the manufacturing, which recorded a growth of 2.2%. The export of motor vehicles and trailers (1.9 pp), electrical equipment (1.8 pp) and the export of machinery and equipment (1.6 pp) contributed the most to the growth of exports of the manufacturing. Import of goods amounted to EUR 2,857.2 mill., which is lower by 14.8% compared to the same month in previous year.

Foreign trade deficit amounted to EUR 511.8 million, which is lower by 54.8% compared to the same month in previous year, while 82.1% of the imports was covered by the exports.

Seasonally adjusted series shows that in April 2023 in comparison to the previous month, export increased by 1.6%, while import decreased by 3.9%.

In the period January–April of 2023, exports amounted to EUR 9,657.7 million, which is higher by 13.1%, while imports amounted to EUR 12,287.0 million, which is lower by 3.3%, compared to the same period of previous year. During the observed period, trade deficit amounted to EUR 2,629.3 million, which is lower by 36.9%, compared to the same period of previous year.

According to the SITC sections, in the first fourth month of 2023, the largest share in the exports came from the export of electrical machinery and apparatus (12.5%). Significant share in the exports also came from metal ores and residues, electricity, power engines and motors and rubber products, n.e.c., which including electrical machinery amounted for 36.0% of total exports. In observed month, 25.3% of total imports came from electrical machines and apparatus,

natural gas, oil and oil derivatives, road vehicles and medical and pharmaceutical products.

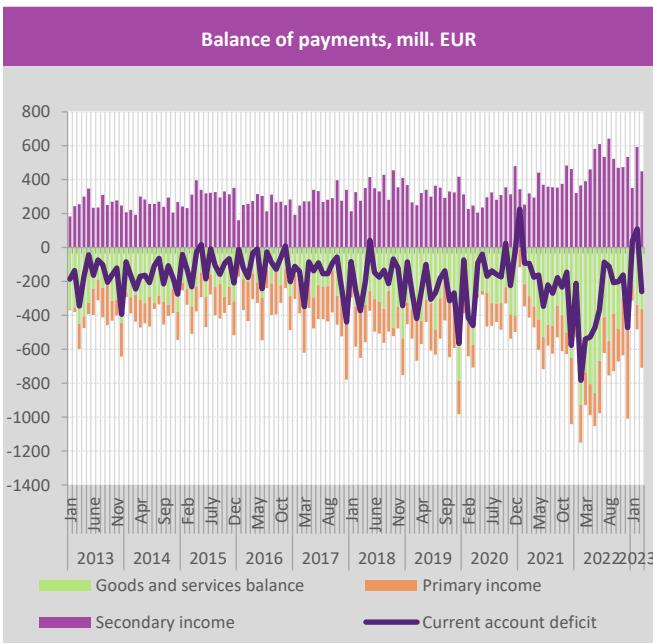

In observed period, positive trade balance (EUR 1,179.6 million) was achieved by the following sectors: crude materials, miscellaneous manufactured products, beverages and tobacco, machinery and transport equipment, food and live animals and vegetable oils.

In the first four months in 2023, the largest external trade partners were EU countries on which related 64.0% of total exports and 56.3% of the total imports. In observed period, 38.9% of the total exports were related to the trade with: Germany, Bosnia and Herzegovina, Italy, Hungary and Romania. Imports from Germany, China, Russia, Italy and Turkey accounted for 42.6% of the total imports. Surplus of EUR 1,342.3 million was achieved in external trade with Montenegro, Bosnia and Herzegovina, North Macedonia, Romania, Slovakia, Croatia, Sweden, Hungary, Czechia, United Kingdom, Bulgaria and Republic of Moldova. The largest deficit was achieved in external trade with China (due to imports of telephones for network stations and laptops), Russia and Turkey.

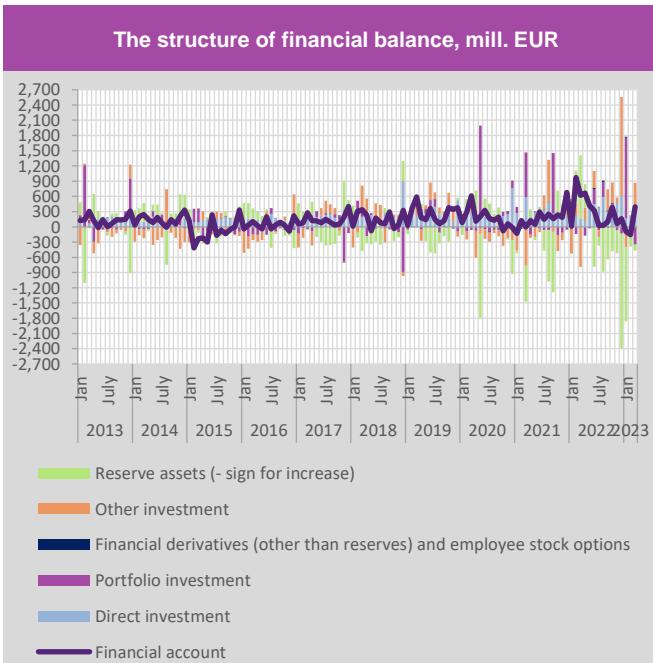

Balance of payments¹. In March 2023, the current account recorded a deficit of EUR 260.5 million, which is lower compared to the same month of the previous year. Lower current account deficit was due to lower deficit on goods and services account, but also a higher surplus on secondary income. The goods account recorded a deficit which is lower by 42.4% compared to the same month of previous year, while the services account recorded a surplus, which amounted to EUR 162.6 million.

In March 2023, net inflow of foreign direct investments amounted to EUR 386.9 million. The total inflow based on FDI amounted to EUR 417.9 million.

¹ Since April 2014, Balance of Payments of the Republic of Serbia is being presented according to the Balance of Payments Manual and international investment position, VI edition of the International Monetary Fund (BPM6).

In the first three months of 2023, the current account recorded a deficit of EUR 111.8 million, due to a significant reduction in the deficit on the goods and services account, but also an increase in the secondary income surplus. The trade deficit is lower by EUR 881.8 million, while surplus in the services account increased by EUR 289.8 million and amounted to EUR 778.5 million. In the observed period, the primary income deficit increased by EUR 65.9 million or 12.6% year on year, while the surplus of secondary income is higher by 29.2%, compared to the same period of previous year and amounted to EUR 1,394.2 million, due to the increased inflow of remittances from abroad (a growth of 38.4%).

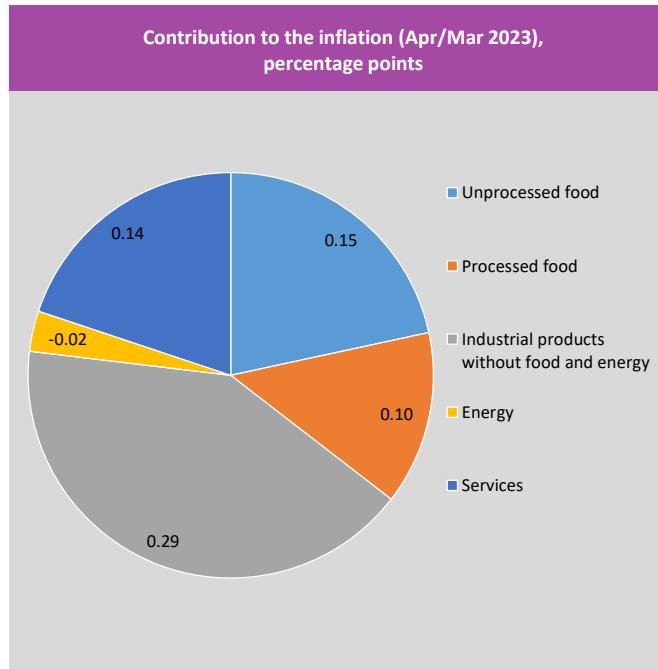

In the observed period, the net inflow of foreign direct investments amounted to EUR 783.9 million, which represents an increase of 39.6% compared to the same period of the previous year. Also, at the same time, a net inflow of portfolio investments was recorded in the amount of EUR 1,237.4 million.

1.3. Inflation

In April 2023, the growth of consumer prices was above the upper limit of the allowed deviation from the inflation target, so it amounted to 15.1% year on year. In this period, around one third of the inflation was determined by the increase in prices of food.

On the monthly basis, consumer prices increased in April by 0.7%.

At the same time, core inflation was significantly lower and amounted to 11.1% y-o-y, which was significantly influenced by the preserved stability of the exchange rate and by inflation expectations of the financial sector within the target.

1.4. Labour market

Looking into the data from the CROSO registry average number of formally employed in April 2023

increased by 3.0%, y-o-y, which is primarily the result of growth in employment in the private sector. At the same time, most significant growth in employment was recorded in ICT, scientific and technical activities, administrative service activities and trade.

According to the Labour Force Survey in the first quarter of 2023, compared to the same quarter of the previous year, the employment rate increased by 1.1 percentage points and amounted to 49.6%. At the same time, the unemployment rate decreased by 0.8 pp to 10.1%.

According to the National employment agency data at the end of April, number of unemployed persons actively seeking employment totalled 416.3 thousands, which is a decline compared to the same month of the previous year by 10.0%.

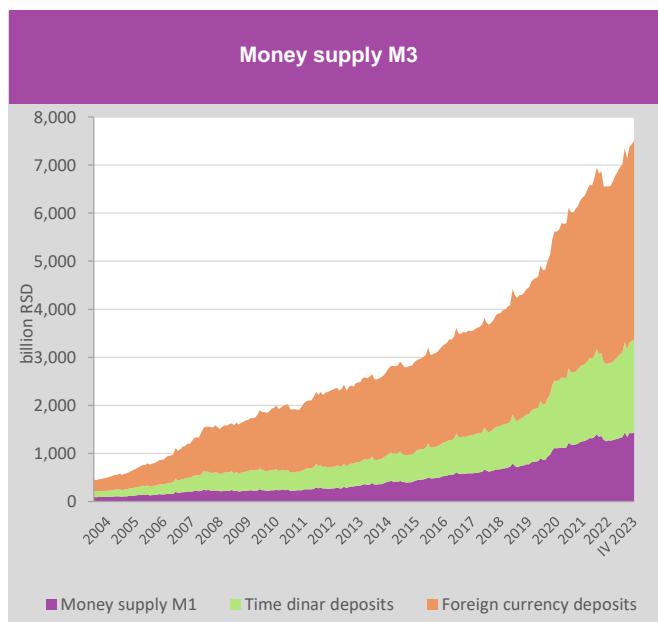

Salaries. In March 2023, the average net salary decreased by 1.5%, y-o-y, in real terms. Observed by activities, real wage growth was recorded only in trade, scientific and technical activities and arts, entertainment and recreation.

Pensions. Average paid pension in April 2023 increased compared to the same month of previous year by 6.1%, in real terms, and amounted to RSD 37,807.

1.5. Monetary developments

In April 2023, NBS increased its key interest rate by 0.25 pp to the level of 6.00%.

Through April, banks as largest single investors in state treasury bills decreased their invested funds on that basis by RSD 20.2 billion. Compared to the same month in the previous year, banks decreased their invested funds by RSD 44.7 billion.

At the end of April 2023, compared to same month of the previous year, bank loans to economy registered mild decrease of 0.2%, while loans to households increased by 3.7%. At the same time, bank deposits registered growth of 11.5%. In structure of loans to economy by destination, biggest share had loans for

current assets and investment loans (45.3% and 38.9%, respectively), with yearly decrease of loans for current assets by 1.1% and increase of investment loans by 3.3%. At the same time at loans landed to households, biggest share had cash loans (43.5%) with yearly growth of 2.7% and housing loans (40.1%), with yearly growth of 6.9%.

In structure of bank sources of funds, dominant share had borrowed sources. At the end of April 2023, in total fund sources borrowed sources share was 88.5%, which is an increase of 0.8 pp y-o-y, while in comparison to the previous month decreased by 0.2 pp. In currency structure of funds, foreign currency sources share was 50.5%, and compared to the same month of previous year decreased by 1.6 pp, while compared to the previous month remained unchanged.

NBS foreign exchange reserves increased by EUR 176.2 million compared to previous month, while compared to the same month of previous year increased by EUR 7.4 billion and totalled EUR 21.6 billion at the end of April 2023. The increase in FX reserves reflects primarily NBS interventions in the local FX market, as well as inflow on account of donations and banks' FX required reserve allocations. Level of NBS foreign exchange reserves was sufficient for coverage of 176% of M1 monetary aggregate and for coverage of around 5.7 months of imports of goods and services.

Household foreign currency savings at the end of April 2023 compared to previous month increased by EUR 12.8 million and totalled EUR 13.8 billion. Compared to same month of the previous year foreign currency savings increased by EUR 0.9 billion.

Developments on the foreign exchange market in April 2023 compared to previous month were characterized by real appreciation of dinar against Euro of 0.1%, while remained unchanged in nominal terms. In comparison to the same month of the previous year, foreign exchange rate recorded nominal and real appreciation of 0.4% and 8.0%, respectively. In order to mitigate extensive daily oscillations of exchange rate, NBS throughout April intervened on the foreign exchange market by net buying EUR 600 million.

1.6. Financial markets

In April 2023 Belgrade stock exchange registered total turnover of securities in amount of RSD 2,882.6 million, from which turnover of shares and Republic of Serbia bonds (RS bonds) totalled RSD 428.7 million and RSD 2,453.9 million, respectively. In comparison to the same month of previous year, total turnover increased by 11.6%. Total number of transactions decreased from 2,071 in April 2022 to 1,424 in the same month of 2023.

Total market capitalization at the end of April 2023 amounted to RSD 433.7 billion and decreased by 0.5% compared to previous month, while compared to same month of previous year decreased by 15.2%.

In April 2023 foreign investors share in total turnover accounted for 0.08% and decreased by 2.58 pp in comparison to same month of the previous year. Share of foreign investors in turnover of shares decreased by 3.78 pp and amounted to 0.56%, while foreign investors had no turnover of RS bonds, which represents a decrease of 2.31 pp compared to same month in the previous year.

During April 2023 on Belgrade stock exchange index BELEXline registered increase in value of 0.5% and totalled 1,806.97 index points, while the value of BELEX15 index increased by 1.5% and totalled 904.49 index points. Compared to the same month of the previous year, index BELEXline increased by 8.7% and index BELEX15 increased by 9.3%.

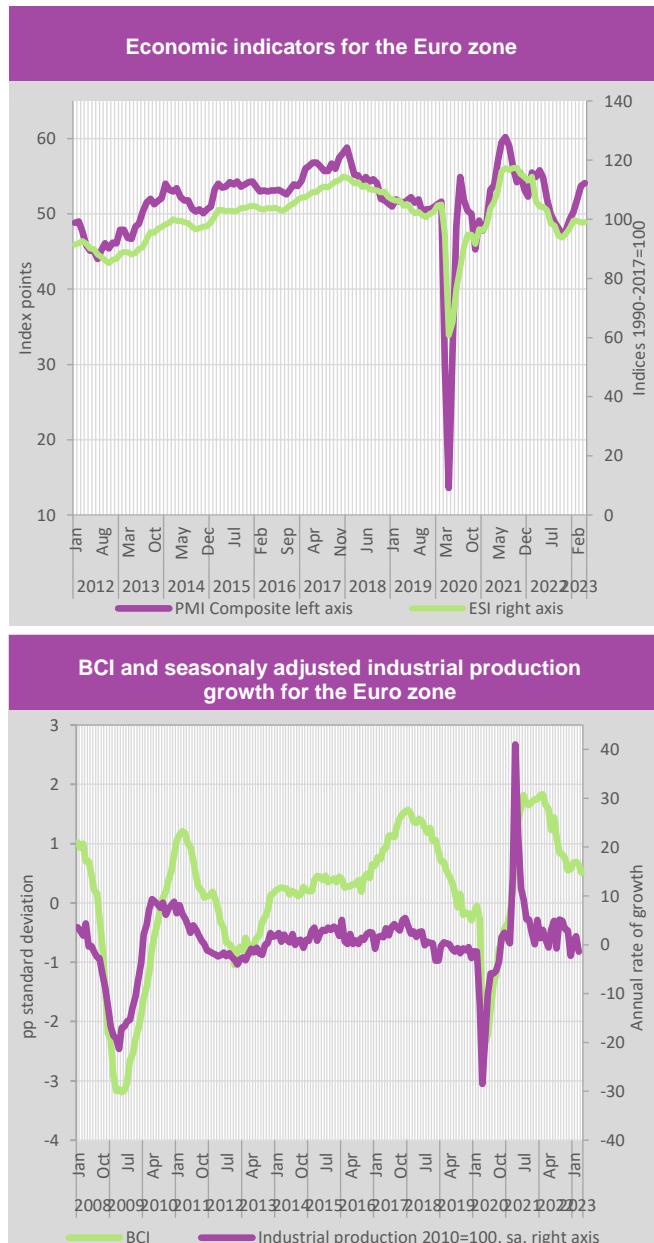

1.7. International environment

According to the Eurostat's estimation, GDP growth in Q1 2023 in the euro area and the EU27 increased by 1.0% each, compared to the same quarter 2022, while comparing to the previous quarter decreased by 0.1% and increased by 0.1%, respectively. According to the ECB outlook, the projected growth will amount to 1.0% in 2023, with mild growth increase to 1.6% in 2025, while the average yearly inflation will slow from 5.3% in 2023 to 2.1% in 2025. The growth projection is characterised with high uncertainty since it does not take into consideration recent financial market developments, but takes into consideration uncertainties caused by developments in the Ukraine, as well as following downside risks and global uncertainties.

Average prices of agriculture products remained unchanged in April 2023 compared to the previous month, while food prices increased by 1.2%. Base metal prices decreased by 4.0%, compared to the previous month, while the price of iron ore decreased by 8.5%, cooper prices decreased by 0.5%. According to the World Steel Association, world production of steel in April 2023 decreased by 2.4% y-o-y, while in China decreased by 1.5% y-o-y (which is somewhat more than a half of World production). In the group of precious metals, the price of gold increased by 4.5%, while the price of silver increased by 14.0%.

Value of the Composite PMI index in April amounted to 54.1 ip (up by 0.4 ip compared to previous month), due to the recovery of manufacturing and services sector output. Economic Sentiment Indicator (ESI) remained unchanged in the EU27 (97.1 ip), while in the euro area mildly increased by 0.1 ip (99.0 ip), compared to previous month.

At the end of April 2023, the unemployment rate in the euro area and EU27 amounted to 6.5% and 6.0%, respectively. At the same time, unemployment rate in Germany and Italy was 2.9% and 7.8%, respectively. At the same time, according to the data of the Russian Statistical Office, in the Russian Federation the unemployment rate was 3.3%.

Trend of inflation during April mildly accelerated, when inflation of 7.0% was registered in the euro area, while inflation of 8.1% was recorded in the EU27. At the same time, inflation of 7.6% and 8.7% was registered in Germany and Italy, respectively. Observed by categories the largest increase was in the prices of: energy, food, alcohol and tobacco, services and non-energy industrial goods. In Russia, the annual inflation reached 2.3%.

In March, ECB decided to increase the interest rate at the level of 3.50%. In order to adjust monetary policy toward inflation stabilisation, PEPP and APP programmes will be gradually reduced, while the monitoring of refinancing terms of banks will be continued. In March, FED increased key interest rate to an interval of 4.75% to 5.00%.

According to the OPEC data, the price of oil type Urals has amounted to 59.97 \$/barrel in April, which is 20.6% higher compared to the previous month. Since the beginning of 2023, the price decreased by 38.7% compared to the same period 2022 and amounted to 53.23 \$/barrel.

¹ From 01/01/2010 Telekom Srbija, Joint Stock Company ceased to observe impulses in fixed network domestic traffic and started to present the subject services in minutes. ² Including turnover generated by legal entities and entrepreneurs. ³ Index shall be accounted according to the data compiled for producer's price index for industrial products in domestic market and producer's export price index for industrial products.

⁴ Since January 1st 2010 general trade system has been introduced. Data for 2007, 2008 and 2009 changed according to new methodology. ⁵ Since April of 2014 Balance of Payments of the Republic of Serbia is shown by the Manual of balance of payments and international investment position, the sixth edition of the International Monetary Fund, the 2009th (BPM6). Accordingly, data for year 2012 and 2013 are corrected. ⁶ Since September 2010 methodology for the external debt statistics has been changed. NBS has revised the data to the external debt since 2009. ⁷ GFS-1986 methodology. ⁸ Data on foreign currency savings since December 2012 according to new methodology of NBS. ⁹ SORS changed data for employment. Without registered individual agricultural workers. ¹⁰ Population aged 15 and above. ¹¹ New methodology for salaries, SORS applied from January 2009, from January 2018 the average salary is calculated on the basis of data from the Tax Administration records. ¹² Since 2012 with professional army servicemen.

* Preliminary annual data. ** SORS calculation based on quarterly data. *** MoF estimation. ¹ The data refers to the period January–March 2023 (the same period of the previous year=100). ² From 01/01/2010 Telekom Srbija, Joint Stock Company ceased to observe impulses in fixed network domestic traffic and started to present the subject services in minutes. ³ Including turnover generated by legal entities and entrepreneurs. ⁴ From 2022, data on tourist traffic (number of tourist arrivals and overnight stays) and accommodation capacities are published on the basis of statistical processing of data taken from the administrative source, the Central Information System in Catering trade and Tourism (eTourist). ⁵ Index shall be accounted according to the data compiled for producer's price index for industrial products in domestic market and producer's export price index for industrial products. ⁶ Since January 1st 2010 general trade system has been introduced. Data for 2007, 2008 and 2009 changed according to new methodology. ⁷ Since April of 2014 Balance of Payments of the Republic of Serbia is shown by the Manual of balance of payments and international investment position, the sixth edition of the International Monetary Fund, the 2009th (BPM6). Accordingly, data for year 2012 and 2013 are corrected. ⁸ Since September 2010 methodology for the external debt statistics has been changed. NBS has revised the data to the external debt since 2009. ⁹ GFS-1986 methodology. ¹⁰ Data on foreign currency savings since December 2012 according to new methodology of NBS. ¹¹ SORS changed data for employment. Without registered individual agricultural workers. ¹² Data from 2010, given according to the new methodology, which has been in use since 2021, refers to the population aged 15 and over. ¹³ New methodology for salaries, SORS applied from January 2009, from January 2018 the average salary is calculated on the basis of data from the Tax Administration records. ¹⁴ Since 2012 with professional army servicemen. ¹⁵ Data refers to January–March. ¹⁶ Data was calculated on the basis of demographic estimates for 2022, according to 2022 Population Census, and are not comparable with previous data. Data for 2023 refer to period January–March.

¹ Since September 2010 methodology for the external debt statistics has been changed so that the external public debt includes obligations under the IMF SDR allocation, which was used in December 2009, as well as capitalized interest to Paris Club creditors, while the loans concluded before December 20, 2000, under which the payments have not been effected, are excluded from the external debt of the private sector.² NBS has revised the data to the external debt since 2009. ³ According to the methodology of GDP - ESA 2010.

¹ New methodology for salaries, which is applied from 2009 as SORS extended coverage of observation units. In calculation of average salaries, beside salaries paid to employees in enterprises, institutions and organizations, into account are taken also salaries paid to entrepreneurs, from January 2018 the average salary is calculated on the basis of data from the Tax Administration records. ² Every year in Health and social work section half of salary is paid in December and another half in January. ³ Since 2012 with professional army servicemen.

* not including activated guarantees for PE Roads of Serbia, which are included in debt repayment to foreign creditors

** 16.9 billion RSD of 39.5 billion RSD on domestic borrowing in July 2009 belongs to PE "Serbian Roads" used for repayment of debt to creditors

*** including repayments of Old foreign currency savings and Loan for economic recovery (Rehabilitation loan)

**** Subsidies incl. RSD 23.4 bln for PE Srbijagas debt and RSD 10.1 bln for subsidies in agriculture. Social assistance incl. RSD 10 bln for military pensions. Total sum included under domestic borrowing

***** Subsidies incl. RSD 13 bln for Petrohemija debt assumption

Note: The Budget System Law envisages the dynamics of the inclusion of entities in order to achieve a comprehensive coverage of the general government sector, in accordance with international standards. According to the predicted dynamics, beneficiaries of the funds of the Republic Fund for Health Insurance, with all sources of financing, are included in the reporting from January 1st, 2023. According to the above, the data for the general government sector in 2022 and 2023 contain both revenues and expenditures from own and other sources of financing (except those from the Health Fund) of health institutions, while the comparability of the series for the years before 2022 will be provided in the following period.

Table 2. Consolidated General Government, by Levels of Government in January-April 2023, in mil dinars

* Adjusted contracted amounts include changes that occurred during the implementation of financed projects, determined by the final calculation at the handover of the performed works, due to deficiencies in relation to the contracted quantities of works and realized savings, etc. Also, deviations may occur by automatic cancellation of unused funds when the loan availability period expires or at the request of the borrower. The adjusted contractual amounts represent the principal to be repaid.

**For the purpose of protection against foreign exchange and interest rate risk, a hedging transaction (interest rate and currency swap) was realized, by which the liabilities of the Republic of Serbia on the basis of a ten-year bond issued in the amount of USD 1.2 billion at a coupon rate of 2.125% were converted and presented in euros, at a significantly lower interest rate of 1.066%.

***Hedging transaction (interest rate and currency swap) was realized _ original loan currency is shown in EUR

METHODOLOGICAL EXPLANATIONS

IV

ECONOMIC, FISCAL AND PUBLIC DEBT STATISTICS

1. Economic statistics (tables in Chapter I, Macroeconomic Developments) are based primarily on the statistical methodology and data provided by the Statistics Office of the Republic of Serbia, National Bank of Serbia, National Employment Agency, Privatization Agency, Belgrade Stock Exchange, Pension and Disability Insurance Fund of the Republic of Serbia etc.

Economic Statistics contained in the Chapter I includes: main indicators of macroeconomic developments in the annual and monthly dynamics for the current year; gross domestic product (GDP) in constant prices and its growth rates by quarters and usage of GDP; trends in physical volume of industrial production in monthly dynamics (total, by sections and economic purpose); consumer prices trends in annual and monthly dynamics; developments of overall consumer prices (in total and by components) in monthly dynamics for current year; producer prices of industrial products for domestic market and for export in annual and monthly dynamics; developments of exports in monthly dynamics; prices of external trade in annual, quarterly and monthly dynamics; developments in Foreign direct investments in quarterly dynamics; external debt in annual dynamics and in last month of current year; balance of payments in annual and monthly dynamics; monetary survey by years; main monetary indicators, household savings and foreign exchange reserves, total number of employed and unemployed and average net salaries and pension benefits (in dinars and annual real growth rates) in annual and monthly dynamics; an overview of privatization results in annual dynamics and for a specific period of the current year for which there are available data; an overview of trends of indices; market capitalization and foreign investors participation in total turnover on Belgrade Stock Exchange; an overview of turnover of securities on the Belgrade Stock Exchange; an overview of auctions of Republic of Serbia treasury bills in annual dynamics and on daily basis.

2. Fiscal statistics (tables in Chapter II Fiscal Developments) is based on the GFS methodology and data of the Ministry of Finance, Treasury Administration and Public Debt Administration.

Starting from Memorandum on the Budget and Economic and Fiscal Policy for 2009 with projections for 2010 and 2011, IMF methodology – Government

Finance Statistics is used to present and create projections for fiscal aggregates. All data in this bulletin have been computed by using the same methodology basis.

The main objectives of alignment with methodology of Government Finance Statistics is the possibility to perceive macroeconomic implications of fiscal policy. It is particularly important to perceive the influence of fiscal policy on domestic demand, hence every item of revenues and expenditures is considered from its aspect, regardless of its classification in accounting.

Here is a comparative overview of the previous and the new methodology of government finance statistics.

1. The level of observation is consolidated government sector that comprises the following levels of government: the central government – budget of the Republic of Serbia and Social Security Organizations; local government – budget of the Autonomous Province of Vojvodina and budgets of municipalities and towns; public road company Putevi Srbije and Koridori Srbije Ltd.

2. Coverage of data: beside budget resources, application of this methodology in computation of fiscal aggregates includes other sources of financing – a part of own resources of government bodies, donations, loans and privatization receipts. The previous coverage included only budget resources and expenditure financed from budget resources.

3. The method of computation of results: The deficit or surplus of consolidated government sector is the difference between revenues and overall expense plus net budget borrowing. The category of net landing is treated as an expense in cases when the purpose of the spending is implementation of a government policy, while if expense is made in order to manage liquidity, it becomes a financing item, without any influence on the government's result.

4. The difference in accounting and statistical coverage of particular items of expenditure: in view of the primary objective – gaining insight into macroeconomic implications of the fiscal policy, particular items of the expenditure, e.g. repayment of debt to pensioners, which is treated in accounting as a part of repayment of debt – without influence on the result, statistically is treated as transfer to citizens and

on ground influences increase in domestic demand. Mobile telephony license, treated in accounting as current non-tax revenue, in view of its one-time character is now treated as part of financing.

With advancement of accounting base – i.e. with transition to accrual basis in recording government transactions – conditions will be created for further enhancement of government finance statistics methodology and for alignment with the EU (ESA 95).

The Ministry of Finance is responsible for collection and processing of fiscal data. Fiscal statistics includes: consolidated balance of the general government sector and particular balances, i.e. budget of the Republic of Serbia (central government), budget of AP Vojvodina, budget of local authorities, financial plans of social security organizations, public road company Putevi Srbije and Koridori Srbije Ltd.

General government. General government sector comprises all the levels of government in the country. Subsectors that form general government include: central government – budget of the Republic of Serbia, provincial government – AP Vojvodina, local government – municipalities, towns, social security funds, public road company Putevi Srbije and Koridori Srbije Ltd. Fiscal statistics, with regard to the individual state subsectors, is especially significant for the understanding of interrelation between different governmental levels, separation of functions as well as division of revenues. It is important to determine the amounts and the flow of transfers between governmental levels, which is achievable only owing to the individual and separate balances of all governmental levels. However, only the data presenting the entire general government may provide the information concerning the amount of fiscal operations of the state, consumption of the state and its influence on aggregate demand and total macroeconomic stability, reallocation of collected funds originating from other economic sectors, burden of taxation of the economy, tax structure etc.

Central government – budget of the RoS. Central government comprises all the ministries, agencies, and other special organizations defined as direct or indirect republic budget beneficiaries.² The Government may define and achieve set goals concerning economic policy at the level of the entire country, primarily through the implementation of certain measures and programmes by the means of the budget of central government. Other governmental levels do not economic policies

concerning the national level. The more centralized is the country, the more significant are the data related to this level of government³.

AP – Vojvodina. Budget of AP Vojvodina comprises all governmental authorities and other special organizations defined as AP Vojvodina budget beneficiaries.

Local self-government. Data concerning local self-government relate to the data collected in all cities and municipalities constituting the local self-government system. The coverage of data at the level of cities or municipalities relate to all direct or indirect budget beneficiaries of a city or a municipality. The budget beneficiary of a city or a municipality is an institution primarily financed from the funds originating from the local government. Local government controls its business activities and it performs certain functions through the institution⁴.

Social security organizations. Social security organizations include the Pension and Disability Insurance Fund, Republic Health Insurance Fund, Military Health Fund and National Employment Service.

Public road company Putevi Srbije. Revenues of Putevi Srbije have the character of public revenues (toll and transfers from republican budget), and repayment of a large part of the company's debt takes place from the Republic of Serbia budget, therefore the company is treated as a part of the general government sector.

Koridori Srbije LTD. are a Government owned company, responsible for investment in road infrastructure.

BASIC FISCAL AGGREGATES

Basic fiscal aggregates are total public revenues, total public expenditures, and the result of the difference between these two categories, which is defined as surplus or deficit in the consolidated balance of general government or balances of individual governmental levels.

³ The largest amount of tax revenues, apart from property taxes, pertains to the budget of the RS. Income tax is renounced in the legally defined percentage to the local self-government, whereas a part of the revenues collected from income taxes realised in the territory of Vojvodina pertains to the AP Vojvodina. This shows the importance of the central governmental level in the country.

⁴ Primary and secondary schools pertain to the central government as their financing is mostly provided from that level. A part of material expenses of schools is financed from local self-government funds but not in the extent sufficient for pertaining of these institutions to the local government. Preschool institutions are local budget beneficiaries. When reviewing data regarding their revenues and expenditures, they are included in the local government level.

² Indirect republic budget beneficiaries are primary and secondary schools, faculties, scientific institutes, social welfare institutions, cultural institutions and other institutions partly financed from the Republic budget.

Total public revenues are divided into two basic categories: current revenues and yield on capital.

Current revenues are divided into tax and non-tax revenues.

The basic characteristics of **tax revenues** is their mandatory nature and non-existence of any direct reciprocal service for the payment of taxes. The state collects taxes finances certain state functions from collected funds. The benefits related to certain functions cannot be directly connected to an individual who paid the tax.

Income tax comprises wage tax, as well as taxes on other forms of earnings of individuals, beside the wages.

Corporate income tax comprises, in addition to corporate profit tax narrow meaning of the term, also tax on dividends paid to the residents and non-residents, as well as the tax on interests, royalties and capital incomes realized by non-residents.

VAT comprises national VAT, import VAT, and the arrears of turnover taxes from the previous years.

Excise duties present consumption taxes concerning specific products such as oil, tobacco, coffee, alcoholic beverages etc.

Customs duties and other import duties comprise revenues from duties paid for import of goods and services, with the exception of the VAT on imported goods that is included in VAT revenues.

Other tax revenues comprise taxes on use, ownership and carrying of goods, and other taxes. The property tax of local government is included in the category of other tax revenues in the general government consolidated balance.

Non-tax revenues are heterogenic category of revenues including property revenues (collected interest, rental fees) compensations, taxes, fines and other revenues that cannot be classified. As opposed to tax revenues, non-tax revenues imply the existence of reciprocal favour for the sum collected - e.g. the compensation for the usage of natural resources. However, there are revenues that may by their characteristics be classified as non-tax revenues, but without implying the reciprocal favour for the collection. Fines are a typical example of this sort of revenue.

Capital revenues comprise only revenues originating from the sale of capital goods, as well as the capital transfers from non-governmental institutions. The sale of capital goods imply the sale of non-financial assets, buildings, inventories and state-owned land.

Total expenditures in the Bulletin of Public Finance are presented according to the economic classification emphasizing the type of expenses, i.e. its economic characteristics and influence of state consumption on the market of goods and services, financial market and reallocation of income. In addition to the economic classification of expenditure, there is also a functional classification emphasizing the function the state performs by using of funds for specific purposes⁵. The Bulletin of Public Finance does not contain expenditures classified in accordance with the functional classification.

Overall expenditure is divided into current expenses, capital expenses and net budget borrowing.

Current expenses present final budget outflows, and are not intended for the procurement of non-financial assets.

Compensation of employees comprise (net) salaries of employees including income tax and contributions paid by employees, contributions paid by employers, as well as other fringe benefits (transport allowance, sick leave allowance for the period up to 30 days etc.).

Procurement of goods and services comprise payments related with coverage of business expenses (electricity, phone bills etc.), business trips, services contracts, current maintenance and procurement of material.

Repayment of interests is divided into repayment of interests on domestic debt, interests on external debt, interests based on activated guarantees and accompanying borrowing expenses.

Subsidies comprise all the funds transferred to the economic sector (public enterprises, registered agricultural holdings etc.) for the coverage of running expenses or/and the grant intended for current business activities.

Social insurance and social welfare expenses include payments to person insured with social security organizations (pensions of beneficiaries of Pension and Disability Insurance Fund, sick leave benefits paid by the Republic Health Insurance Fund, unemployment benefits paid by the National Employment Service, Repayment of debt to pensioners, children and family benefits, benefits for war-disabled persons, pregnancy leave benefits,

⁵ Division of expenditures according to the functional classification is the following: general public services, defence, internal security, economic affairs, environmental protection, housing construction and municipal services, healthcare, recreation, culture and religion, education and social welfare.

housing benefits, Military Health Fund expenditures etc.

Other current expenses include grants to non-governmental organizations, mandatory levies and penalties imposed by one governmental level to another, fines and penalties imposed by courts and judicial bodies, injury compensations or compensations for damages incurred by natural disasters, and damages incurred by the public bodies. **Capital expenses** comprise all the payments intended for the procurement of non-financial assets, construction of buildings and infrastructure, procurement of equipment and inventories and the purchase of land.

Net lending are expenses for purchase of financial assets whose objective is implementation of a particular government policy.

General government consolidated balance contains consolidated revenues and consolidated expenditure.

Consolidated revenues are aggregate revenues of individual governmental levels, but in the consolidation procedure, transfers received from other governmental levels are excluded. In the consolidation procedure, benefits paid by general government in the function of employer are excluded from the revenues of mandatory social insurance organizations.

Consolidated expenses present aggregate expenditures of individual governmental levels, while in the consolidation procedure, transfers provided from one governmental level to another are excluded. In the consolidation procedure, expenditures paid by general government in the function of employer are excluded from the expenditures.

Consolidated surplus / deficit is a difference between consolidated revenues and consolidated expenditure.

Balance surplus/ deficit of individual governmental levels is a difference between total revenues and total expenditures, at a particular governmental level.

Earnings not included in the revenues of general government present earnings based on domestic and external borrowing and earnings based on the privatization of state-owned enterprises.

Expenses that are not included in general government expenses are those for repayment of principal of national and foreign debt and expenses for purchase of financial assets that cannot be classified as net lending.

3. Public Debt Statistics (Tables in Chapter III – Public Debt) is based on the data of the Republic of Serbia Treasury Administration. The public debt of the Republic of Serbia consists of direct liabilities (received loans) and indirect liabilities (issued guarantees).

Direct Liabilities

Direct Liabilities of the RoS are those incurred on the basis of the loans taken. Direct liabilities, depending on the creditor, constitute the following: (1) domestic debt and (2) foreign debt.

Domestic Debt consists of liabilities carried over from the past, and liabilities stemming from short-term treasury notes. The largest share in the domestic debt is the one of the frozen foreign currency savings, which also constitutes the largest individual debt in the public debt of the RoS.

Foreign Debt consists of (1) rescheduled old debt and (2) new borrowing.

The rescheduled debt consists of: (1) the debt towards International Bank for Reconstruction and Development (IBRD, A, B, C), (2) debt towards the Paris Club of Creditors, (3) debt towards the London Club of Creditors, (4) debt towards Council of Europe Development Bank (CEB).

1. Indirect Liabilities

Indirect liabilities of the RoS are those incurred on the basis of the issued guarantees. Due to the fact that the guarantees that have been issued up to date were related with loans taken from foreign creditors, total indirect liabilities fall under the category of foreign debt.

Public Debt to Gross Domestic Product Ratio

Debt to GDP ratio is one of the most important indicators of the public debt sustainability and one of the convergence criteria for joining the EMU.

Structure of Interest Rates

The ratio between the fixed and variable interest rates in the public debt of Serbia is distinctly favourable. High share of the fixed interest rates provides high level of predictability of future liabilities arising from the interest and thus the Republic of Serbia is not exposed to the interest rate risk.

The Public Debt Currency Structure

The public debt consists of different currencies. The largest share, however, is the debt denominated in Euros and US Dollars.
