CURRENT MACROECONOMIC AND FISCAL DEVELOPMENTS

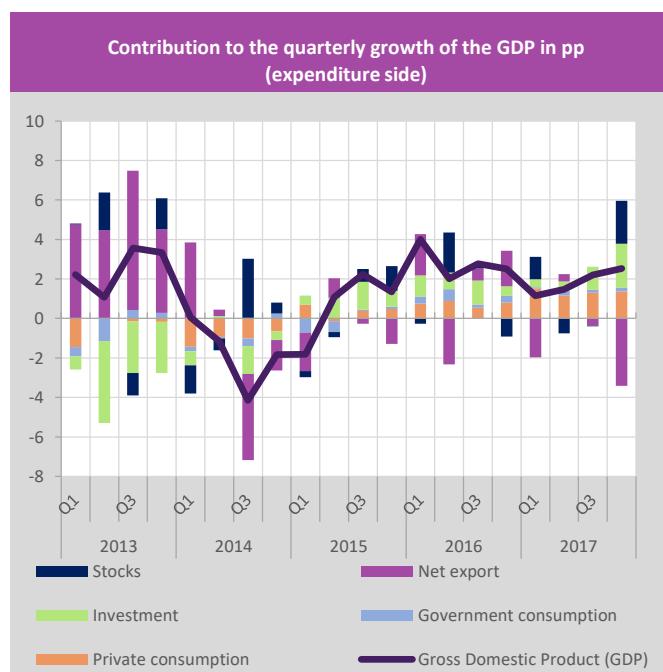

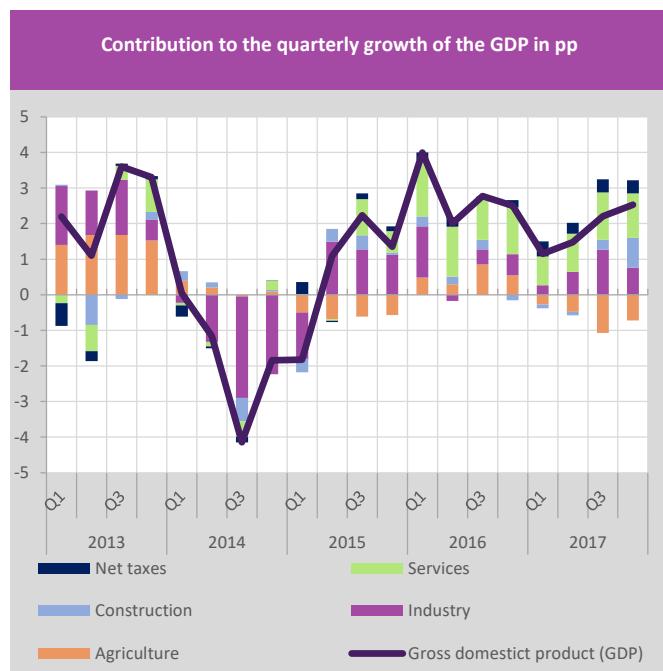

1. Current macroeconomic developments

1.1. Economic activity

Gross Domestic Product. In the fourth quarter of 2017, GDP growth of 2.5 was recorded. At the same time, growth rates for the first two quarters were revised up by 0.1 p.p., while the third quarter growth rate was revised down by 0.1 p.p. On the production side, growth is driven by the services sector (contribution of 1.3 pp), followed by industry and construction which contributed to growth by 0.8 pp each, and a positive contribution of net taxes of 0.4 pp. Agriculture remains negative impact on GDP of 0.7 pp. Observed from the expenditure side, the dominant source of growth is investment activity, with a contribution of 2.2 pp, followed by the stocks increase and private consumption, which contributed by 2.2 and 1.2 pp, respectively. Mild positive contribution came from public consumption as well (by 0.2 p.p.), while the net exports contributed negatively (by 3.4 p.p.). According to seasonally adjusted GDP data, gross domestic product increased by 0.6% in the fourth quarter of 2017, compared to the previous quarter.

Observed as a sum of four quarters, a real GDP growth of 1.9% is counted for 2017. Observing the supply side, dominant source of growth was services sector with a positive contribution of 1.1 p.p. Industry and construction have determined GDP growth by 0.7 and 0.2 p.p., each. Negative contribution of agriculture of 0.6 pp has came as a consequence of extremely harsh weather conditions.

Observed from the use side, the most significant contributions came from private consumption and investments, 1.3 pp and 1.1 pp, respectively. Timidly positive contribution came from the government expenditure, while the contribution of net exports is negative (-1.2 p.p.).

Industrial production. According to the Statistical Office of the Republic of Serbia (SORS) data, industrial production in January 2018 has increased annually by 10.6%, while compared to the average industrial production in 2017 decreased by 6.0%. The largest influence on industrial production growth in January 2018 compared to January 2017 had the divisions of: manufacture of non-metallic mineral products, manufacture of chemicals and chemical products, generation of electricity, manufacture of basic metals and manufacture of refined petroleum products.

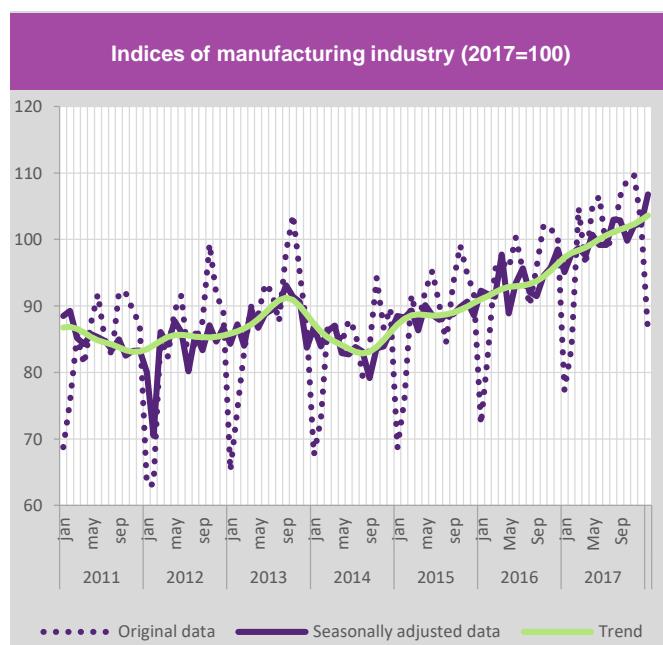

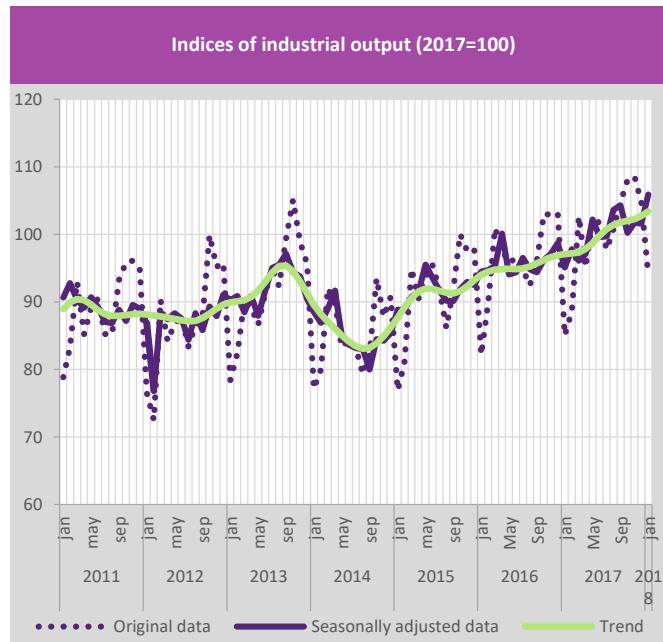

Observed by NACE Rev.2, in January, annual increase in production was registered in all of the sections. The largest increase in output was registered in the production of manufacturing (11.3%), while in the production of mining and quarrying and of electricity, gas, steam and air conditioning supply an increase of 9.3% and 8.5%, respectively was registered. In the production of the division of other mining and quarrying the largest increase in production was registered (122.7%), while in the output of the division manufacture of other transport equipment largest fall was observed of 38.0%.

The industrial production volume in January 2018, in comparison to the same month in 2017, recorded an increase within 25 divisions, which accounts for 82% of total industrial production, while a decrease in 4 divisions, accounts for 18% of the total industrial production.

Observed by the destination groups, in January 2018, compared to January 2017, increase in the production was recorded in the production of durable consumer goods (27.7%), intermediate products, except energy (22.3%), energy (9.5%) and non-durable consumer goods (3.8%), while output of the capital products production has declined by 1.7%.

In January 2018 it was recorded an increase of industrial production of 10.6%. Observed by destination groups, the main contribution to the growth came from the production of intermediate goods, except energy (increase of 22.3%) due to the increase in production of chemicals, metal, metals, rubber and plastics products. Also, a growth of 9.5% was observed in the production of energy, due to increase in production of coke, oil derives and electricity. Increase in beverages and tobacco products production has influenced the most to the increase in output of the group of non-durable consumer goods (3.8%). Output increase could have been higher if the food industry did not registered a decline of 1.0% (share in total industrial production of 16%). Production of durable consumer goods has recorded a strong growth of 27.7% due to increased output of the furniture industry. Decrease in production of capital products of 1.7% is a result of decrease in production of computers and other transport equipment.

The seasonal adjustment of the industrial production index for January 2018, compared to December 2017, indicates 4.2% growth of the overall industrial production and 4.3% growth of manufacturing.

According to the SORS data, in January 2018 stocks increased by 8.0% compared to January 2017. The largest annual increase in stocks in January was recorded in the stocks of division of basic metals production (41.1%), while the stocks of the area of production of metal ores declined the most, by 33.3%.

Retail trade turnover. Annual growth of the retail trade turnover in January 2018 increased by 9.0% in nominal and by 7.1% in real terms, compared to January 2017. Also, in January, turnover in real terms, decreased by 10.4% compared to the average monthly retail trade turnover in 2017, while compared to previous month, decreased by 21.3%.

Annual growth of the categories food, beverages and tobacco was 7.6% in nominal terms, while in real terms increased by 2.1%. Also, category non-food products, except automotive fuels increased in nominal and real terms by 9.2% and 8.1% respectively. Motor fuel's turnover increased by 12.3% in nominal and by 9.9% in real terms.

Increase in the retail trade turnover in nominal terms was observed in all the regions: Serbia – north by 7.1%, Vojvodina by 11.1% and region Serbia – south by 12.5%, y-o-y. Observed in real terms, growth in the turnover was registered in all the regions, and the biggest increase of 10.5% y-o-y was achieved in the region of and Serbia – south.

Tourism. Annual growth in the number of tourists' visits was registered in January 2018 (11.4%). At the same time, the number of overnight stays increased by 12.8% compared to the same month of the previous year. The number of domestic tourists' visits increased by 7.9%, while the number of their overnight stays increased by 8.3%, compared to the same month in 2017. At the same time, the number of foreign tourists' visits continued to grow strong by 15.9%, while their overnight stays also increased by 18.2%. Share of the foreign tourists' visits and their overnight stays was 46.1% and 39.5%, respectively.

Most of the tourists in January 2018 originated from Montenegro, Bulgaria, Bosnia and Herzegovina, Romania and Croatia (39.5% of the total number of foreign tourists' visits and 42.1% of total overnight stays), while the largest annual growth was registered in the tourists' visits from China. In January, mountains were more visited than the spas (31.7% and 13.8% of the total number of visits, respectively). On the mountains and spas most of the tourists were of domestic origin, while in city of Belgrade most of the tourists were foreigners (80.6% of the total number of visits). The largest number of overnight stays was achieved in the mountains (45.4% of the total number of overnight stays of all tourists).

Construction. Value of finished construction works on the territory of the Republic of Serbia in the fourth quarter of 2017 has increased by 18.7% in real terms, compared to the last quarter of 2016. At the same quarter, the value of building constructed increased by 13.9%, while other civil engineering works by 20.8% compared to Q4 2016. Increase in the construction works done was followed by a decline in the number of workers (-1.3%) while hours of their work increased by 3.0% compared to the same quarter of 2016.

Value of finished construction works on the territory of Republic of Serbia in 2017 in comparison with the 2016 increased by 5.2% in real terms (on buildings increased by 8.1%, while on other constructions by 3.9% was registered).

Besides the increase in the construction works done on the territory of the Republic of Serbia, 2017 was marked by the increase in the value of new contracts of 12.8%.

Transportation and telecommunication. In Q4 2017 transportation services growth has slowed down. Physical volume of transportation services in Q4 2017 has decreased by 1.4%, compared to Q4 2016 due to the fall in the air transport services of 10.3% despite the increase in the road services of 4.7%. At the same time,

volume of services in land transportation has increased by 6.6% compared to the same quarter of 2016.

In the same quarter, scope of postal services has decreased by 8.5%, while physical scope of telecommunication services has increased by 1.5%.

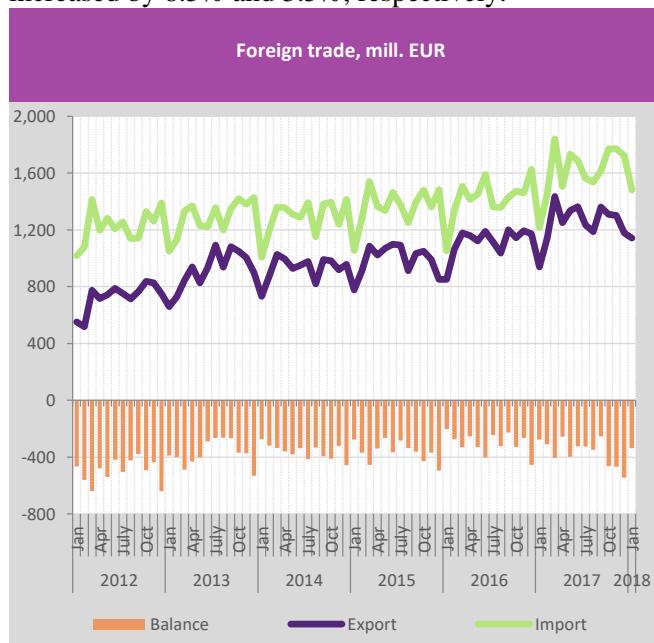

In 2017, physical volume of transportation increased by 8.7% in comparison with 2016. Scope of passenger's transportation services measured by the number of transported passengers, decreased by 6.6%, while measured by passengers' kilometers increased by 1.4% in comparison with the previous year. In freight transport, number of goods transported increased by 1.9% compared with the 2016, as well as the number of distance covered kilometers measured in tons by 8.5%.

Scope of postal services increased by 1.5% compared to 2016, while the physical scope of telecommunication services decreased by 3.2%. At the same time, receding trend in the landline telecommunication continued as fixed networks recorded a decline of 14.4%, measured by achieved minutes of conversation, while the number of outgoing calls in the mobile minutes increased by 1.6%.

1.2. External Trade and Balance of Payments

External trade. In January 2018, it was exported EUR 1,143.3 million of good, which is an increase of 21.6% compared to January 2017. The biggest contribution to annual growth of the exports came from the exports of base metals (contribution of 4.9 pp), motor vehicles and trailers (2.9 pp) and rubber and plastic products (2.6 pp). Import of goods amounted EUR 1,479.7 million, which is an increase of 21.6% compared to January 2017. Foreign trade deficit was 21.8% higher than in January 2017 and amounted EUR 336.4 million, while 77.3% of the exports was covered by the imports.

Seasonally adjusted series shows that in January 2018 in comparison to the previous month, export and import increased by 8.5% and 3.5%, respectively.

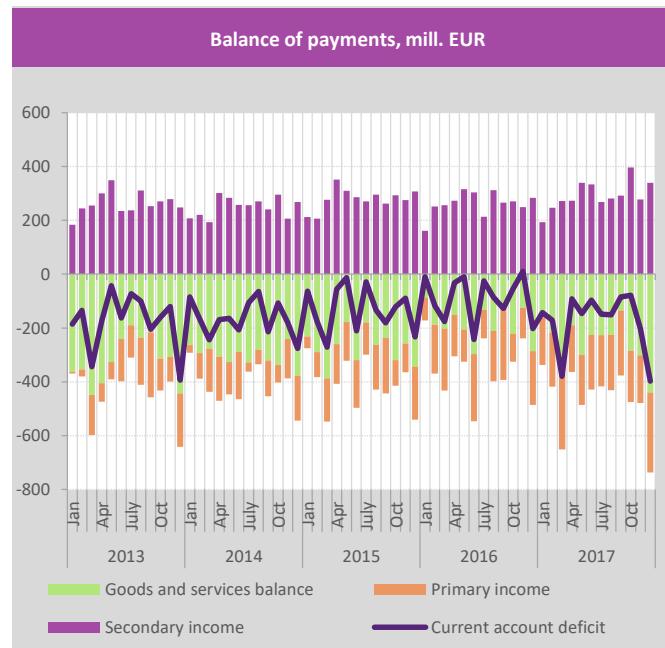

According to the SITC sections, in January 2018, largest share in the exports came from the export of electrical machinery and apparatus (11.2%). Significant share in the exports also came from road vehicles, iron and steel, non-ferrous metals and rubber products, which including electrical machinery amounted for 36.5% of total exports. In the observed month, 25.6% of total imports came from import of petroleum and petroleum products, electrical machinery and apparatus, road vehicles, gas and medical and pharmaceutical products.

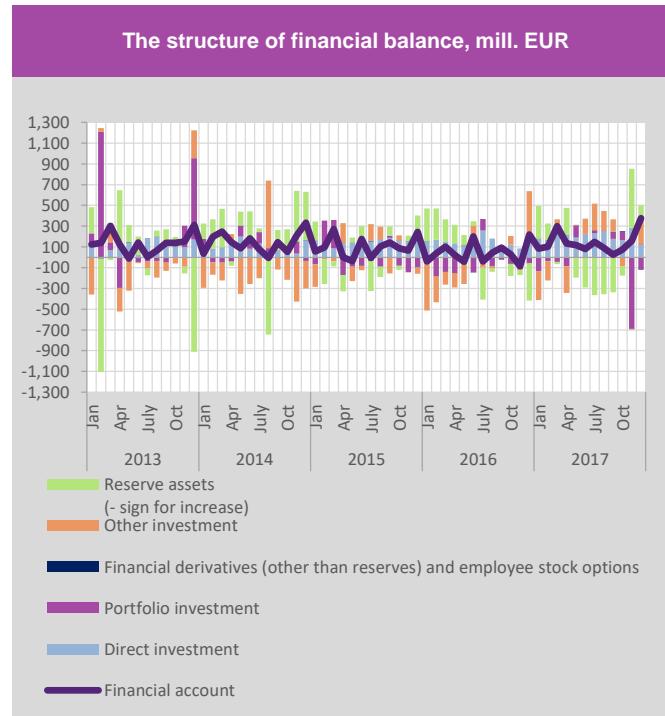

Positive trade balance in January 2018 (EUR 157.3 million) was achieved by the following sectors: miscellaneous manufactured goods (clothes, furniture, footwear), manufactured goods, food and livestock, beverages and tobacco, animal and vegetable oil and machinery and transport equipment.

In January 2018, largest external trade partners were EU countries on which related 70.7% of total exports and 58.6% of the total imports. In observed month 45.2% of the total exports were related to the trade with: Italy, Germany, Bosnia and Herzegovina, Russian Federation and Hungary. Imports from Germany, Russian Federation, China, Italy and Hungary accounted for 44.8% of the total imports. Surplus of EUR 198.9 million was achieved in external trade with Bosnia and Herzegovina, Italy, Montenegro, Macedonia, Bulgaria, Slovakia, United Kingdom, Croatia, Slovenia and Sweden. The largest deficit was achieved in external trade with China (due to imports of telephones for network stations and laptops), Russian Federation and Hungary (due to imports of energy, mainly petroleum and gas).

Balance of payments¹. In December 2017, the current account recorded a deficit of EUR 397.4 million, which is less compared to the deficit in the same month of previous year by EUR 195.3 million. Higher current account deficit was due to higher deficit on goods and services account and higher primary income deficit. The goods and services account deficit increased by EUR 153.7 million compared to the same month in 2016. The goods deficit increased by EUR 162.5 million, while the services surplus increased by EUR 8.8 million.

Net inflow of foreign direct investments and other investments amounted EUR 121.8 and 253.5 million, respectively, while there was recorded the outflow in portfolio investments amounted EUR 123 million.

During 2017, the balance of payments position of the country was deteriorated. The current account deficit in this period amounted to EUR 2,089.6 million and was higher by EUR 1,014.7 compared to the same period in 2016, due to higher deficit in the goods and services account and higher primary income deficit.

The trade deficit increased by EUR 867.4 million, while the surplus in the services trade increased by EUR 43.9 million. The primary income deficit increased by EUR 547.8 mill, mainly due to higher outflows of direct investments income. The secondary income surplus

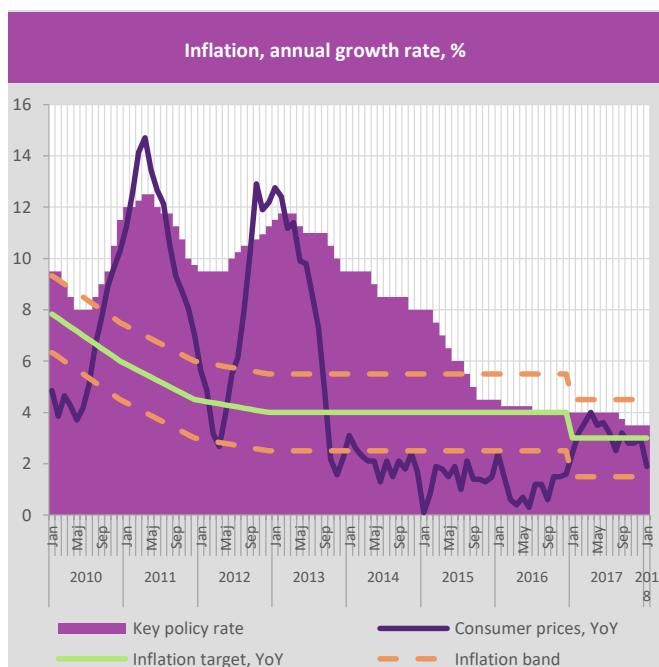

¹ Since April 2014, Balance of Payments of the Republic of Serbia is being presented according to the Balance of Payments Manual and Public Finance Bulletin, January 2018.

increased by EUR 356.5 million compared to the previous year, mostly due to the higher personal transfers inflow (by EUR 248.5 million net).

Net inflow of foreign direct investments amounted EUR 2,414.7 million, which is an increase of EUR 515.5 million compared to the 2016 year. Other investments amounted net inflow EUR 309.7 mill, while portfolio investments recorded net outflow of EUR 827.1 mill. After six months of portfolio investments inflows during 2017, primarily as a result of investments of foreign investors in the seven-year state securities, in November an outflow of EUR 698.8 mil. was recorded, as a result of the repayment of Eurobond 2012.

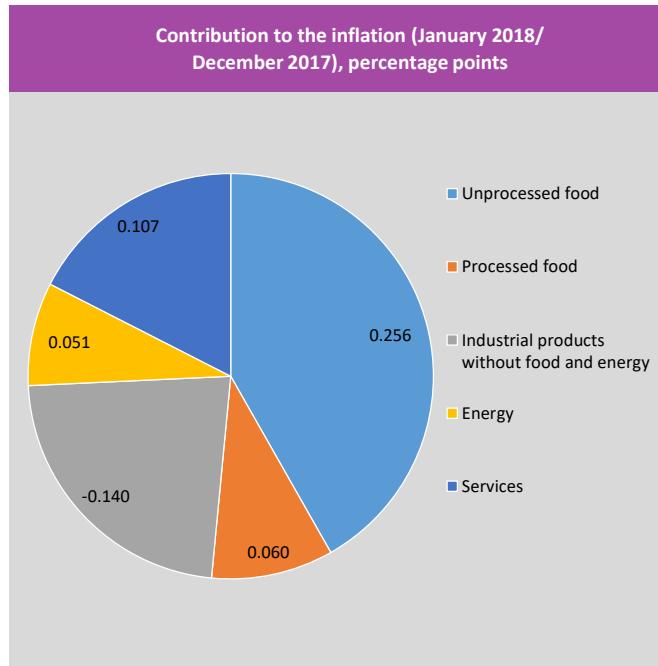

1.3. Inflation

Annual inflation in January 2018 was within the limit of the NBS target tolerance band ($3\% \pm 1.5$ pp). In this period inflation totaled 1.9%, which was mainly influenced by the price increase of fruits, mobile phone services, tobacco, nonalcoholic beverages, firewood and travel arrangements.

Consumer prices in January 2018 increased compared to previous month by 0.3%, mainly because of increase in vegetable prices.

Observed by main groups of products and services, y-o-y growth of consumer prices in January was registered within the following groups: Food and non-alcoholic beverages (2.1%), Alcoholic beverages and tobacco (3.6%), Housing (2%), Furnishings household equipment and routine maintenance of the house (1%), Health (1.4%), Transport (0.5%), Communication (4.4%), recreation and culture (5.2%), education (0.6%) and restaurants and hotels (1.3%).

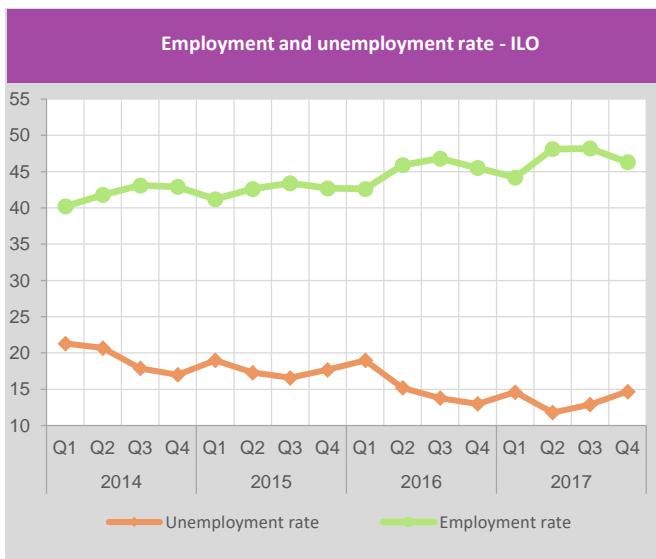

Core inflation, measured by the increase of the consumer prices from which is excluded the increase of energy, food, alcohol and tobacco in January 2017 decreased by 0.1%, while increased by 1.2%, y-o-y.

1.4. Labor market

According to the Labor Force Survey developments on the labor market in Q4 2017 marked increase of the unemployment rate compared to the same period of the previous year and totaled to 14.7%. In Q4 2017 total number of employed persons increased by 1.2%, y-o-y, which was mostly influenced by the increase of employment in the industry and services sector. At the same time informal employment rate decreased by 1.1 p.p. to 19.8%, while long-term unemployment rate increased by 0.5 pp and totaled 8.8%.

According to data from the CROSO registry average number of formally employed in January 2018 increased by 3.7%, y-o-y, which is entirely the result of growth in employment in the private sector (5.8%), while in the public sector decreased by 0.9%. At the same time, growth in employment was recorded in manufacturing industry, trade, etc, which is in line with the favorable economic developments in these sectors.

According to the National employment agency data (NEA) at the end of January number of unemployed persons actively seeking employment totaled 626 thousands which is compared to the same month of the previous year decrease by 9.8%.

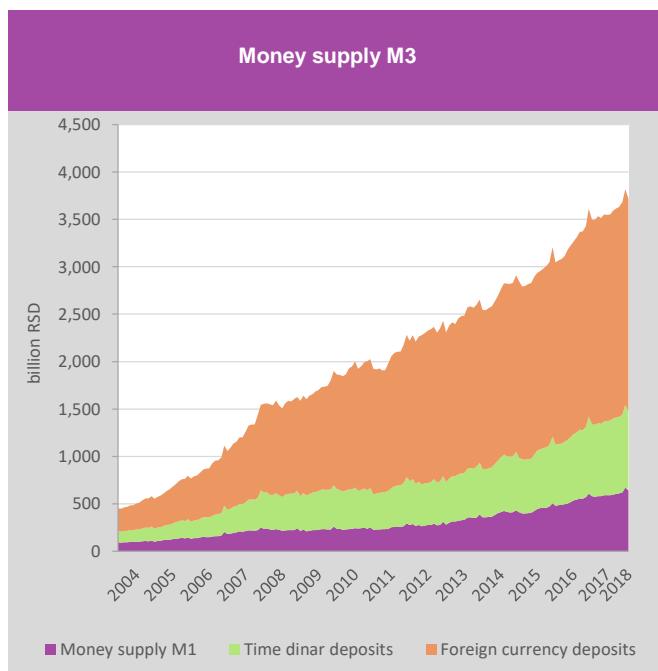

Pensions. Average paid pension in January 2018 increased in real terms compared to same month of previous year by 3%. The average paid pension in that month accounted for 49.9% of average net salary, which is a decrease by 1.1 pp on the yearly basis. At the same time, the total number of pension beneficiaries decreased by 0.3%.

1.5. Monetary developments

In January 2018, NBS kept its key interest rate to the level of 3.50%.

Through January, banks as largest single investors in state treasury bills decreased their invested funds on that basis by RSD 12.0 billion. Compared to the same month in the previous year, banks increased their invested funds by RSD 12.2 billion.

At the end of January 2018, compared to same month of 2017 bank loans to economy registered decrease of 1.1%, while loans to households increased by 7.9%. At the same time bank deposits registered growth of 2.7%. In structure of loans to economy by destination biggest share at the end of January had loans for current assets

and investment loans (46.8% and 30.4%, respectively), with yearly increase of loans for current assets by 6.7% and decrease of investment loans by 3.4%. At the same time at loans landed to households, biggest share had housing loans (39.3%) with yearly fall of 1.3% and cash loans (38.1%), with yearly growth of 25.5%.

In structure of bank sources of funds dominant share had borrowed sources. At the end of January 2018 in total fund sources borrowed sources share was 83.0%, and stayed the same compared to the same month in the previous year, while in comparison to the previous month increased by 1.5 p.p. In currency structure of funds, foreign currency sources share was 51.7%, and compared to previous month increased by 0.4 p.p, while compared to the same month of previous year increased by 1.1 p.p.

NBS foreign exchange reserves decreased by EUR 314.0 million compared to previous month, while compared to the same month of previous year decreased by EUR 206.6 million and totaled EUR 9.6 billion at the end of January 2018. The decline in gross and net FX reserves is due to outflows on account of NBS FX sale interventions in the IFEM, government net repayment of FX loans as well as the negative effect of intercurrency changes in the international financial market. Level of NBS foreign exchange reserves was sufficient for coverage of 180% of M1 monetary aggregate and for coverage of around five months of imports of goods and services.

Household foreign currency savings at the end of January 2018 compared to previous month increased by EUR 47.8 million and totaled EUR 9.4 billion. Compared to same month of previous year foreign currency savings increased by EUR 389.9 million.

Developments on the foreign exchange market in January 2018 compared to previous month were characterized by nominal depreciation and real appreciation of dinar against Euro by 0.2% and 1.0%, respectively. In comparison to the same month of 2017, foreign exchange rate recorded nominal and real appreciation of 4.4% and 5.0%, respectively. In order to mitigate extensive daily oscillations of exchange rate, NBS throughout January intervened on the foreign exchange market by selling EUR 180 million.

1.6. Financial markets

In January 2018 Belgrade stock exchange registered total turnover of securities in amount of RSD 9,720.4 million, from which turnover of shares and Republic of Serbia bonds (RS bonds) totaled RSD 639.5 million and RSD 9,081.0 million, respectively. In comparison to the same month of previous year, total turnover increased by 130.0%. Total number of transactions increased from 5,120 in January 2017 to 6,377 in the same month of 2018.

Total market capitalization at the end of January 2018 amounted to RSD 550.7 billion and increased by 0.3%

compared to previous month, while compared to same month of previous year decreased by 6.0%.

In January 2018 foreign investors share in total turnover accounted for 17.27% and decreased by 0.02 pp in comparison to same month of 2017. Share of foreign investors in turnover of shares decreased by 9.77 pp and amounted to 37.60%, while the share of foreign investors in turnover of RS bonds amounted to 15.84%, which represents increase of 6.48 pp compared to January 2017.

During January 2018 on Belgrade stock exchange index BELEXline registered decrease in value of 2.1% and totaled 1,627.36 index points, while the value of BELEX15 index increased by 1.8% and totaled 773.37 index points. Compared to same month of 2017, index BELEXline increased by 5.9%, and index BELEX15 also increased by 10.6%.

1.7. Privatization

According to the Ministry of Economy, in January 2018, there were no sales of social enterprises in tender and auction, but there were sales on the capital market which amounted to EUR 290 thousand. The sale of the minority packages of shares at the Belgrade stock Exchange of two already privatized enterprise from the Agency's fund portfolio.

In the period from 2002 to January 2018, 2,432 enterprises were sold (81 in the tenders, 1,517 on the auctions, 785 in the capital markets, 47 by the sale of capital and two by the sale of assets). The revenue from sales was EUR 2,615,3 million. The sale of minority share packages of 1,088 already privatized enterprises from the Agency's fund portfolio, achieved income of EUR 113.3 million on the Belgrade Stock Exchange. Total revenue from privatization in this period amounted to EUR 2,728.6 million, and total investment amounted to around EUR 1 billion.

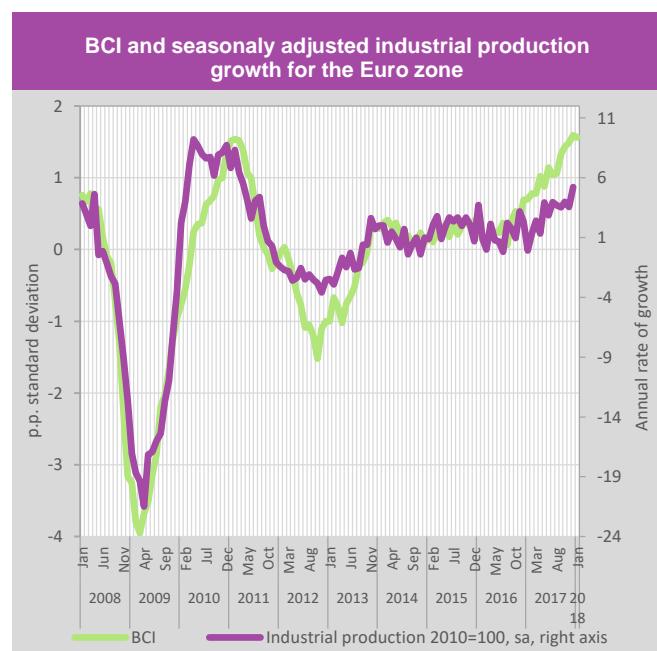

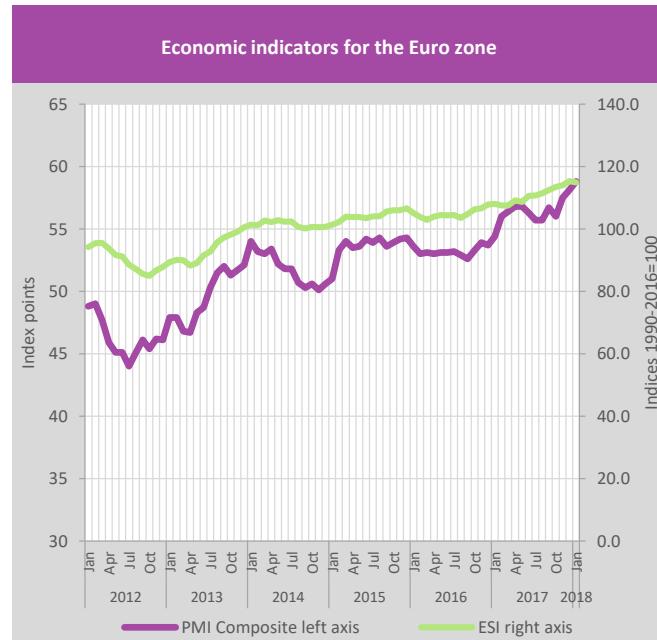

1.8. International environment

According to the Eurostat's preliminary flash estimation from 30/01/2018, the euro area and the EU28 has achieved a growth of 2.7% and 2.6% in q4 2017, respectively, compared to q4 2016 (by 0.6%, respectively each compared to the previous quarter).

Average **prices of agriculture products** have increased by 2.5% in January compared with the previous month, while the **food prices** by 2.6%. Average **metal prices** have increased in January by 5.3%. Prices of iron ore have recorded an increase of 5.7% in January, while cooper price a growth of 3.4% compared to December. According to the World Steel Association, world production of steel in January 2018 increased annually by 0.8%, but it declined in China by 0.9% (slightly less than a half of World production). In the group of **precious metals**, the price of gold have increased by

5.3%, as the price of silver by 6.0%, compared to December.

Value of the Composite PMI index in January (58.6 i.p.) has increased by 0.5 p.p. compared to December due to acceleration of growth of services and despite slowdown of growth in manufacturing. In January, the Economic Sentiment Indicator (ESI) decreased in the euro area (by 0.6 index points to 114.7) and, in the EU28 (by 0.4 points to 114.7), compared to December.²

At the end of January 2018, the unemployment rate in the euro area has been reduced to 8.6% which was the lowest rate of unemployment since May 2009. At the same time, unemployment rate in Germany was 3.6% and in EU28 and Italy it was 7.3% and 11.1%, respectively. At the same time, according to the data of

² The indicator of confidence of entrepreneurs (BCI) is based on an estimate of production, orders and inventories, as well as current and future expectations of entrepreneurs. The index value above 100 indicates improvement in economic activity, while a value below 100 indicates deterioration.

the Russian Statistical Office, in Russian Federation the unemployment rate was 5.2%.

Trend of inflation has timidly decelerated during January also, when in the euro area and the EU28 an inflation of 1.3% and 1.6%, respectively was registered. At the same time in Germany inflation of 1.4% was observed, while in Italy of 1.2%. Observed by categories the largest increase was in the prices of: catering services, food and non-alcoholic beverages and cigarettes. In Russia, the annual inflation in January reached 2.2%.

During December, The Governing Council of ECB has kept the interest rate at record low level of 0%, while the FED has decided to hike the rate from 1.25% to 1.50% in December.

According to the Organization of the Petroleum Exporting Countries (OPEC), the price of oil type Urals in January has increased to 68.69 \$/barrel (7.7% compared to December).

2. Current fiscal developments³

In January 2018, compared to the January 2017, General Government revenues recorded nominal and real growth. Total public revenues (incl. donations) have recorded a real rise by 3.2%.

Current revenues were 3.2% higher, in real terms. Donations have achieved a real growth of 30.2% compared to January previous year.

Within the current revenues category, in January 2018 in real terms, tax revenue increased by 3% while non-tax revenues recorded 5.1% real growth.

Within tax revenues all tax categories except VAT, recorded nominal and real growth compared to January 2017.

Personal income tax. The level of personal income tax revenue in January 2018 achieved nominal increase by 10.8% and 8.7% real increase, compared to January previous year. Because most of the income tax is comprised from wage tax (approx. 77%), its dynamics predominantly influences the overall personal income tax revenue. In January 2018 compared to January 2017 nominal (net) wages increased by 7.2%, while nominal increase of wage tax revenue in the same period was 13.2%. Since January 2017, the distribution of revenue from wage tax between local government and the Republic has changed to 74:26 in favour of municipalities, 77:23 in favour of cities and 66:34 in favour of the City of Belgrade. Other types of personal income tax receipts (tax on revenue of self-employed persons, tax on royalties, taxes on rental income, annual income tax etc.) increased nominally by 3.2%.

Corporate income tax. In January 2018, compared to January 2017, the nominal level of corporate profit tax (which shares at the moment, around 91.9% of total corporate income tax revenue) increased by 42.5%, while the real increase in the same period was 39.9%. The movement of this category is subject to the profitability of companies in the previous year. The final obligation arises at the end of the year, however, income tax shall be paid during the year, according to the amount of tax liability for the previous year. The deadline for the obligation is end July. Revenue from other types of profit tax recorded a nominal fall of 44.6%⁴, while the real fall was 45.7%.

Value added tax. VAT revenues were by 12.3% lower in real terms in January 2018, compared to January 2017. Its nominal decrease was 10.7%. Net domestic VAT fell nominally by 69.3% and by 69.9% in real terms in the observed period. Gross VAT collected was 2.2% higher in real terms, and posted a nominal increase of 4.2% compared to January 2017. Total amount of

VAT refunds was by 62.1% higher nominally and by 59.1% higher, in real terms, compared to January 2017, due to acceleration of VAT refunds. Exports recorded 16.6% increase in dinars. VAT on imported goods, on the other side, recorded 30.8% nominal rise and 28.4% real increase. In the observed period imports increased by 16.6%, in dinars.

Excises. Excise collection in January 2018 increased nominally by 5.7% while the real amount of excise taxes collected was by 3.7% higher, compared to January 2017. Revenue from excise on oil derivatives increased nominally by 35.2% and were by 32.7% higher in real terms. Excise Law regulates the excise duty reimbursements for oil used for transportation purposes, for inland waterway cargo transport, for agricultural purposes, heating and industrial purposes. Revenue from excise on tobacco products decreased by 9.7% in real terms, and by 8% in nominal terms. Revenues from excises on alcoholic beverages recorded 6.8% real growth. Excise on coffee products decreased by 47.8%, in real terms. Excise tax on electricity consumption recorded real fall by 4.6% in January 2018 compared to the same month previous year.

Customs. The level of customs revenues is the result of imports in the period under review, its structure, exchange rates, as well as the implementation of the Stabilization and Association Agreement with the EU, with which Serbia carries out the largest part of foreign trade, as well as the free trade agreements with EFTA and Turkey. The gradual reduction and abolition of customs tariffs has resulted in reduced revenue on this basis. With the completion of the process of harmonization with the EU there has been a stabilization of revenue on this basis, and nominal growth afterwards. Nominal increase in customs revenues in January 2018 compared to January 2017 was 19.7%, while real rise was 17.5%.

Other tax revenue. Other tax revenues increased by 16.7%, in real terms, in January 2018, compared to January previous year. Property tax, which is attributed to local authorities, accounts for the biggest share of other tax revenue. Property tax revenue was by 21.6% higher nominally, while in real terms it was 19.3% higher than the same month previous year. Other tax revenue (motor vehicle tax, firearms tax etc.) recorded nominal increase of 17.7% and real increase of 15.5% compared to the 2017 year, mostly due to increase of revenues from motor vehicles registration.

Social contributions. The real level of revenue from social contributions in January 2018 was by 10.7% higher compared to January 2017. Nominal increase in contributions revenue in the observed period was 12.8%.

³ Revenue, expense and result of the consolidated general government are presented in chapter II Fiscal Developments, Table 1.A more detailed overview of revenues and expense by governmental levels can also be found in tables in chapter II Fiscal Developments.

⁴ Other profit taxes include tax on distributed profit, tax on corporate profit from interest, royalties and capital gains paid to non-residents and profit tax from lease of movable and immovable property.

In January 2018, collected contributions paid by self-employed persons were by 17% higher nominally, while contributions paid for pension and disability insurance for farmers were nominally by 12.3% lower, compared to January previous year. Revenues from contributions for pension and disability insurance for employed persons increased nominally by the rate of 12.4%, revenues from military contributions increased by the rate of 10.8%, revenues from health security increased nominally by 13%, while unemployment insurance contributions increased by 13%.

In January 2018, compared to January 2017, the Government spending posted a nominal increase of 7.7%. In the observed period total public expenditure posted a real increase by 5.7%.

Among total public expenditure in January 2018 current expenditure recorded 10% nominal increase and 8% real increase compared to January 2017.

Expenditures for employees. In January 2018 the General Government wage bill was by 19.4% higher, in real terms, while it's nominal increase was 21.7% in comparison with January 2017. The nominal movements at particular levels of government were as follows: the Republic budget expenditures increased by 8.7%, while Local Governments recorded a 13.7% nominal growth. The movement of payroll expenditures is the result of regular indexation of individual earnings during the year, employment trends in the state and dynamics of other expenses for employees (social benefits, rewards, severance package, reimbursements etc.), but also due to freezing of new hiring. In 2017 the new economic measures came into force and included increasing salaries for the employees of the Ministry of Interior, Ministry of Defense, Security Information Agency, Administration for the Enforcement of Penal Sanctions - only for civil servants and employees in penal and correctional institutions and justice by 5%; primary and secondary education by 6%; higher education by 3%; scientific research institutions - researchers (except for university researchers) and supporting staff by 5%; cultural institutions by 5%; social and health care by 5%, and preschools by 6%.

Procurement of goods and services. Real level of expenditure for procurement of goods and services in the January 2018 was higher by 15.7% in comparison with January 2017 while it's nominal increase was 17.9%. The largest growth was recorded at local level of government (cities and municipalities), Health Fund, and Republican budget.

Repayment of interest. Funds spent for the repayment of interest in January 2018 are by 14.9% lower in real terms compared to same month previous year. Decline of interest expenditures both on domestic and foreign debt was recorded at almost all levels of government.

⁵ Other transfers to residents include payments made by mandatory social insurance organizations for different purposes: care for the elderly, funeral costs, medical aid etc.

Movement of these expenditures is conditioned by the repayment plan for principal and interest on debt payoff. Interest are mostly paid from the state budget. Interest expenditures increased its share in total expenditures significantly during recent years. This was due to the growing financing needs, currency structure of the debt and interest rates. At the end of 2016 and beginning of 2017 the public debt stabilized and debt to GDP ratio trend reverted, and together with favorable conditions on financial markets, it will reduce the share of these expenditures.

Subsidies. Subsidies paid in January 2018 were 8.8% lower in real terms, compared to the January 2017. In January 2018 the largest part of subsidies paid from level of Republic belongs to: PE Roads of Serbia, local level of government (cities and municipalities) and JSC Serbian Railways.

Social assistance and other transfers to households. Real level of transfers to households was higher by 1.8%, in January 2018 compared to the same month a year before. Expenditures for pensions recorded a real growth by 2.2% and nominal increase by 4.2%. In 2017 pensions were raised by 1.5%. Nominal decrease for unemployment benefits (0.3%), and nominal decrease of expenditure for sick leave (0.3%) are recorded. Social assistance recorded nominal increase of 5% while other categories of transfers to households that include various forms of social assistance and transfers from the local and provincial level⁵ recorded nominal fall of 6.8%.

Capital expenditures. In January 2018, capital expenditure recorded nominal and real growth by 184.6% and 179.3% respectively, compared to January previous year. The execution of capital expenditures in January 2018 is higher than planned for a given month by 1.9%.

Activated guarantees. In accordance with the new methodology, applied in 2015, activated guarantees which are paid from the state budget are recorded as expenditures (excluding guarantees for PE Roads of Serbia listed as repayment of foreign debt). In January 2018 these expenditures were by 88.6% lower nominally, and by 88.8% lower in real terms compared to January 2017.

Net lending. These expenses have shown a nominal and real increase in the observed period, by 91.5% and 87.9%, respectively. Some forms of incentive measures for the economy and the households are also included within this category.

In January 2018, General Government posted a RSD 18.7 bln consolidated surplus. In January 2017, General Government posted a RSD 20.7 bln consolidated surplus.

Republican budget posted RSD 22.1 bln surplus. Pension Fund achieved RSD 7.4 bln deficit, Health Fund posted deficit of RSD 1.2 bln, Military Health Fund and Unemployment Fund were in balance, while Road Fund (PE Roads of Serbia and Koridori Srbije Ltd.) posted RSD a 1.4 bln surplus. Local Government (cities and municipalities) posted a RSD 2.7 bln surplus, while AP Vojvodina surplus stood at RSD 1.0 bln.

Central Government posted a RSD 15.0 bln surplus, while Local Government surplus stood at RSD 3.7 bln.

¹ Since September 2010 methodology for the external debt statistics has been changed so that the external public debt includes obligations under the IMF SDR allocation, which was used in December 2009, as well as capitalized interest to Paris Club creditors, while the loans concluded before December 20, 2000, under which the payments have not been effected, are excluded from the external debt of the private sector.

² NBS has revised the data to the external debt since 2009.

³ According to the new methodology of GDP - ESA 2010.

¹ New methodology for salaries, which is applied from 2009. as SORS extended coverage of observation units. In calculation of average salaries, beside salaries paid to employees in enterprises, institutions and organizations, into account are taken also salaries paid to entrepreneurs. ² Every year in Health and social work section half of salary is paid in December and another half in January.. ³ Since 2012 with professional army servicemen.

METHODOLOGICAL EXPLANATIONS

IV

ECONOMIC, FISCAL AND STATISTICS OF PUBLIC DEBT

1. Economic statistics (tables in Chapter I, Macroeconomic Developments) are based primarily on the statistical methodology and data provided by the Statistics Office of the Republic of Serbia, National Bank of Serbia, National Employment Agency, Privatization Agency, Belgrade Stock Exchange, Pension and Disability Insurance Fund of the Republic of Serbia etc.

Economic Statistics contained in the Chapter I includes: main indicators of macroeconomic developments in the annual and monthly dynamics for the current year; gross domestic product (GDP) in constant prices and its growth rates by quarters and usage of GDP; trends in physical volume of industrial production in monthly dynamics (total, by sections and economic purpose); consumer prices trends in annual and monthly dynamics; developments of overall consumer prices (in total and by components) in monthly dynamics for current year; producer prices of industrial products for domestic market and for export in annual and monthly dynamics; developments of exports in monthly dynamics; prices of external trade in annual, quarterly and monthly dynamics; developments in Foreign direct investments in quarterly dynamics; external debt in annual dynamics and in last month of current year; balance of payments in annual and monthly dynamics; monetary survey by years; main monetary indicators, household savings and foreign exchange reserves, total number of employed and unemployed and average net salaries and pension benefits (in dinars and annual real growth rates) in annual and monthly dynamics; an overview of privatization results in annual dynamics and for a specific period of the current year for which there are available data; an overview of trends of indices; market capitalization and foreign investors participation in total turnover on Belgrade Stock Exchange; an overview of turnover of securities on the Belgrade Stock Exchange; an overview of auctions of Republic of Serbia treasury bills in annual dynamics and on daily basis.

2. Fiscal statistics (tables in Chapter II Fiscal Developments) is based on the GFS methodology and data of the Ministry of Finance, Treasury Administration and Public Debt Administration. Starting from Memorandum on the Budget and Economic and Fiscal Policy for 2009 with projections for 2010 and 2011, IMF methodology – Government Finance Statistics is used to present and create projections for fiscal aggregates. All data in this bulletin have been computed by using the same methodology basis.

The main objectives of alignment with methodology of Government Finance Statistics is the possibility to perceive macroeconomic implications of fiscal policy. It is particularly important to perceive the influence of fiscal policy on domestic demand, hence every item of revenues and expenditures is considered from its aspect, regardless of its classification in accounting.

Here is a comparative overview of the previous and the new methodology of government finance statistics.

1. **The level of observation** is consolidated government sector that comprises the following levels of government: the central government – budget of the Republic of Serbia and Social Security Organizations; local government – budget of the Autonomous Province of Vojvodina and budgets of municipalities and towns; public road company Putevi Srbije and Koridori Srbije Ltd.

2. **Coverage of data:** beside budget resources, application of this methodology in computation of fiscal aggregates includes other sources of financing – a part of own resources of government bodies, donations, loans and privatization receipts. The previous coverage included only budget resources and expenditure financed from budget resources.

3. **The method of computation of results:** The deficit or surplus of consolidated government sector is the difference between revenues and overall expense plus net budget borrowing. The category of net landing is treated as an expense in cases when the purpose of the spending is implementation of a government policy, while if expense is made in order to manage liquidity, it becomes a financing item, without any influence on the government's result.

4. **The difference in accounting and statistical coverage of particular items of expenditure:** in view of the primary objective – gaining insight into macroeconomic implications of the fiscal policy, particular items of the expenditure, e.g. repayment of debt to pensioners, which is treated in accounting as a part of repayment of debt – without influence on the result, statistically is treated as transfer to citizens and on ground influences increase in domestic demand. Mobile telephony license, treated in accounting as current non-tax revenue, in view of its one-time character is now treated as part of financing.

With advancement of accounting base – i.e. with transition to accrual basis in recording government transactions – conditions will be created for further enhancement of government finance statistics methodology and for alignment with the EU (ESA 95).

The Ministry of Finance is responsible for collection and processing of fiscal data. Fiscal statistics includes: consolidated balance of the general government sector and particular balances, i.e. budget of the Republic of Serbia (central government), budget of AP Vojvodina, budget of local authorities, financial plans of social security organizations, public road company Putevi Srbije and Koridori Srbije Ltd.

General government. General government sector comprises all the levels of government in the country. Subsectors that form general government include: central government – budget of the Republic of Serbia, provincial government - AP Vojvodina, local government- municipalities, towns, social security funds, public road company Putevi Srbije and Koridori Srbije Ltd. Fiscal statistics, with regard to the individual state subsectors, is especially significant for the understanding of interrelation between different governmental levels, separation of functions as well as division of revenues. It is important to determine the amounts and the flow of transfers between governmental levels, which is achievable only owing to the individual and separate balances of all governmental levels. However, only the data presenting the entire general government may provide the information concerning the amount of fiscal operations of the state, consumption of the state and its influence on aggregate demand and total macroeconomic stability, reallocation of collected funds originating from other economic sectors, burden of taxation of the economy, tax structure etc.

Central government-budget of the RoS. Central government comprises all the ministries, agencies, and other special organizations defined as direct or indirect republic budget beneficiaries.⁶ The Government may define and achieve set goals concerning economic policy at the level of the entire country, primarily through the implementation of certain measures and programmes by the means of the budget of central government. Other governmental levels do not economic policies concerning the national level. The more centralized is the country, the more significant are the data related to this level of government⁷.

AP – Vojvodina. Budget of AP Vojvodina comprises all governmental authorities and other special organizations defined as AP Vojvodina budget beneficiaries.

Local self-government. Data concerning local self-government relate to the data collected in all cities and municipalities constituting the local self-government system. The coverage of data at the level of cities or municipalities relate to all direct or indirect budget beneficiaries of a city or a municipality. The budget beneficiary of a city or a municipality is an institution primarily financed from the funds originating from the local government. Local government controls its business activities and it performs certain functions through the institution⁸.

Social security organizations. Social security organizations include the Pension and Disability Insurance Fund, Republic Health Insurance Fund, Military Health Fund and National Employment Service.

Public road company Putevi Srbije. Revenues of Putevi Srbije have the character of public revenues (toll and transfers from republican budget), and repayment of a large part of the company's debt takes place from the

Republic of Serbia budget, therefore the company is treated as a part of the general government sector.

Koridori Srbije LTD. are a Government owned company, responsible for investment in road infrastructure.

BASIC FISCAL AGGREGATES

Basic fiscal aggregates are total public revenues, total public expenditures, and the result of the difference between these two categories, which is defined as surplus or deficit in the consolidated balance of general government or balances of individual governmental levels.

Total public revenues are divided into two basic categories: current revenues and yield on capital.

Current revenues are divided into tax and non-tax revenues.

The basic characteristics of **tax revenues** is their mandatory nature and non-existence of any direct reciprocal service for the payment of taxes. The state collects taxes finances certain state functions from collected funds. The benefits related to certain functions cannot be directly connected to an individual who paid the tax.

Income tax comprises wage tax, as well as taxes on other forms of earnings of individuals, beside the wages.

Corporate income tax comprises, in addition to corporate profit tax narrow meaning of the term, also tax on dividends paid to the residents and non-residents, as well as the tax on interests, royalties and capital incomes realized by non-residents.

VAT comprises national VAT, import VAT, and the arrears of turnover taxes from the previous years.

Excise duties present consumption taxes concerning specific products such as oil, tobacco, coffee, alcoholic beverages etc.

Customs duties and other import duties comprise revenues from duties paid for import of goods and services, with the exception of the VAT on imported goods that is included in VAT revenues.

Other tax revenues comprise taxes on use, ownership and carrying of goods, and other taxes. The property tax of local government is included in the category of other tax revenues in the general government consolidated balance.

Non-tax revenues are heterogenic category of revenues including property revenues (collected interest, rental fees) compensations, taxes, fines and other revenues that cannot be classified. As opposed to tax revenues, non-tax revenues imply the existence of reciprocal favor for the sum collected - e.g. the compensation for the usage

⁶ Indirect republic budget beneficiaries are primary and secondary schools, faculties, scientific institutes, social welfare institutions, cultural institutions and other institutions partly financed from the Republic budget.

⁷ The largest amount of tax revenues, apart from property taxes, pertains to the budget of the RS. Income tax is renounced in the legally defined percentage to the local self-government, whereas a part of the revenues collected from income taxes realised in the territory of Vojvodina pertains to the AP Vojvodina. This shows the importance of the central governmental level in the country.

⁸ Primary and secondary schools pertain to the central government as their financing is mostly provided from that level. A part of material expenses of schools is financed from local self-government funds but not in the extent sufficient for pertaining of these institutions to the local government. Pre-school institutions are local budget beneficiaries. When reviewing data regarding their revenues and expenditures, they are included in the local government level.

of natural resources. However, there are revenues that may by their characteristics be classified as non-tax revenues, but without implying the reciprocal favor for the collection. Fines are a typical example of this sort of revenue.

Capital revenues comprise only revenues originating from the sale of capital goods, as well as the capital transfers from non-governmental institutions. The sale of capital goods imply the sale of non-financial assets, buildings, inventories and state-owned land.

Total expenditures in the Bulletin of Public Finance are presented according to the economic classification emphasizing the type of expenses, i.e. its economic characteristics and influence of state consumption on the market of goods and services, financial market and reallocation of income. In addition to the economic classification of expenditure, there is also a functional classification emphasizing the function the state performs by using of funds for specific purposes⁹. The Bulletin of Public Finance does not contain expenditures classified in accordance with the functional classification.

Overall expenditure is divided into current expenses, capital expenses and net budget borrowing.

Current expenses present final budget outflows, and are not intended for the procurement of non-financial assets.

Compensation of employees comprise (net) salaries of employees including income tax and contributions paid by employees, contributions paid by employers, as well as other fringe benefits (transport allowance, sick leave allowance for the period up to 30 days etc.).

Procurement of goods and services comprise payments related with coverage of business expenses (electricity, phone bills etc.), business trips, services contracts, current maintenance and procurement of material.

Repayment of interests is divided into repayment of interests on domestic debt, interests on external debt, interests based on activated guarantees and accompanying borrowing expenses.

Subsidies comprise all the funds transferred to the economic sector (public enterprises, registered agricultural holdings etc.) for the coverage of running expenses or/and the grant intended for current business activities.

Social insurance and social welfare expenses include payments to person insured with social security organizations (pensions of beneficiaries of Pension and Disability Insurance Fund, sick leave benefits paid by the Republic Health Insurance Fund, unemployment benefits paid by the National Employment Service, Repayment of debt to pensioners, children and family benefits, benefits for war-disabled persons, pregnancy leave benefits, housing benefits, Military Health Fund expenditures etc.

Other current expenses include grants to non-governmental organizations, mandatory levies and penalties imposed by one governmental level to another,

fines and penalties imposed by courts and judicial bodies, injury compensations or compensations for damages incurred by natural disasters, and damages incurred by the public bodies.

Capital expenses comprise all the payments intended for the procurement of non-financial assets, construction of buildings and infrastructure, procurement of equipment and inventories and the purchase of land.

Net lending are expenses for purchase of financial assets whose objective is implementation of a particular government policy.

General government consolidated balance contains consolidated revenues and consolidated expenditure.

Consolidated revenues are aggregate revenues of individual governmental levels, but in the consolidation procedure, transfers received from other governmental levels are excluded. In the consolidation procedure, benefits paid by general government in the function of employer are excluded from the revenues of mandatory social insurance organizations.

Consolidated expenses present aggregate expenditures of individual governmental levels, while in the consolidation procedure, transfers provided from one governmental level to another are excluded. In the consolidation procedure, expenditures paid by general government in the function of employer are excluded from the expenditures.

Consolidated surplus/ deficit is a difference between consolidated revenues and consolidated expenditure.

Balance surplus/ deficit of individual governmental levels is a difference between total revenues and total expenditures, at a particular governmental level.

Earnings not included in the revenues of general government present earnings based on domestic and external borrowing and earnings based on the privatization of state-owned enterprises.

Expenses that are not included in general government expenses are those for repayment of principal of national and foreign debt and expenses for purchase of financial assets that cannot be classified as net lending.

3. Public Debt Statistics (Tables in Chapter III – Public Debt) is based on the data of the Republic of Serbia Treasury Administration. The public debt of the Republic of Serbia consists of direct liabilities (received loans) and indirect liabilities (issued guarantees).

1. Direct Liabilities

Direct Liabilities of the RoS are those incurred on the basis of the loans taken. Direct liabilities, depending on the creditor, constitute the following: (1) domestic debt and (2) foreign debt.

Domestic Debt consists of liabilities carried over from the past, and liabilities stemming from short-term treasury notes. The largest share in the domestic debt is

and municipal services, healthcare, recreation, culture and religion, education and social welfare.

⁹ Division of expenditures according to the functional classification is the following: general public services, defence, internal security, economic affairs, environmental protection, housing construction

Public Finance Bulletin, December 2017.

the one of the frozen foreign currency savings, which also constitutes the largest individual debt in the public debt of the RoS.

Foreign Debt consists of (1) rescheduled old debt and (2) new borrowing.

The rescheduled debt consists of: (1) the debt towards International Bank for Reconstruction and Development (IBRD, A, B, C), (2) debt towards the Paris Club of Creditors, (3) debt towards the London Club of Creditors, (4) debt towards Council of Europe Development Bank (CEB).

2. Indirect Liabilities

Indirect liabilities of the RoS are those incurred on the basis of the issued guarantees. Due to the fact that the guarantees that have been issued up to date were related with loans taken from foreign creditors, total indirect liabilities fall under the category of foreign debt.

Public Debt to Gross Domestic Product Ratio

Debt to GDP ratio is one of the most important indicators of the public debt sustainability and one of the convergence criteria for joining the EMU.

Structure of Interest Rates

The ratio between the fixed and variable interest rates in the public debt of Serbia is distinctly favorable. High share of the fixed interest rates provides high level of predictability of future liabilities arising from the interest and thus the Republic of Serbia is not exposed to the interest rate risk.

The Public Debt Currency Structure

The public debt consists of different currencies. The largest share, however, is the debt denominated in Euros and US Dollars.
